

Pushing Performance

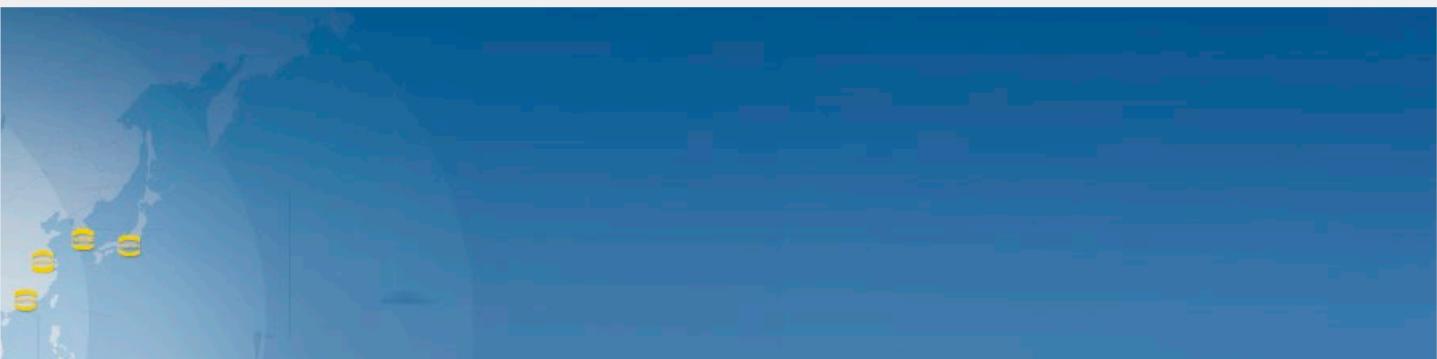

HARTING Smart Network Infrastructure
Intelligent Network Solutions

Transforming customer wishes into concrete solutions

The HARTING Technology Group is skilled in the fields of electrical, electronic and optical connection, transmission and networking technology, as well as in manufacturing, mechatronics and software creation. The Group uses these skills to develop customized solutions and products such as connectors for energy and data-transmission/data-networking applications, including, for example, mechanical engineering, rail technology, wind energy plants, factory automation and the telecommunications sector. In addition, HARTING also produces electro-magnetic components for the automobile industry and offers solutions in the field of housing technology and shop systems.

The HARTING Group currently comprises 51 subsidiary companies and worldwide distributors employing a total of about 4,000 staff.

HARTING Subsidiary

HARTING Representation

We aspire to top performance.

Connectors ensure functionality. As core elements of electrical and optical termination, connection and infrastructure technologies, they are essential in enabling the modular construction of devices, machines and systems across an extremely wide range of industrial applications. Their reliability is a crucial factor guaranteeing smooth functioning in the manufacturing area, telecommunications, applications in medical technology – in short, connectors are at work in virtually every conceivable application area. Thanks to the ongoing development of our technologies, our customers enjoy investment security and benefit from durable, long-term functionality.

Wherever our customers are, we're there.

Increasing industrialization is creating growing markets that are characterized by widely diverging demands and requirements. What these markets all share in common is the quest for perfection, increasingly efficient processes and reliable technologies. **HARTING** is providing these technologies – in Europe, the Americas and Asia. In order to implement customer requirements in the best possible manner, the **HARTING** professionals at our international subsidiaries engage in up-close, partnership-based interaction with our customers, right from the very early product development phase.

Our on-site staff form the interface to the centrally coordinated development and production departments. In this way, our customers can rely on consistently high, superior product quality – worldwide.

Our claim: Pushing Performance.

HARTING provides more than optimally attuned components. In order to offer our customers the best possible solutions, on request **HARTING** contributes a great deal more and is tightly integrated into the value-creation process. From ready-assembled cables through to control racks or ready-to-go control desks. Our aim is to generate maximum benefit for our customers – with no compromises!

Quality creates reliability – and warrants trust.

The **HARTING** brand stands for superior quality and reliability – worldwide. The standards we set are the result of consistent, stringent quality management that is subject to regular certifications and audits.

EN ISO 9001, the EU Eco-Audit and ISO 14001:2004 are key elements here. We take a proactive stance towards new requirements, which is why **HARTING** is the first company worldwide to have obtained the new IRIS quality certificate for rail vehicles.

HARTING technology creates added value for customers.

Technologies by HARTING are at work worldwide. HARTING's presence stands for smoothly functioning systems powered by intelligent connectors, smart infrastructure solutions and sophisticated network systems. Over the course of many years of close, trust-based cooperation with its customers, the HARTING Technology Group has become one of the leading specialists globally for connector technology. We offer individual customers specific and innovative solutions that go beyond the basic standard functionalities. These tailored solutions deliver sustained results, ensure investment security and enable customers to achieve significant added value.

Opting for HARTING opens up an innovative, complex world of concepts and ideas.

In order to develop and produce connectivity and network solutions serving an exceptionally wide range of connector applications in a professional and cost-effective manner, HARTING not only commands the full array of conventional tools and basic technologies. Above and beyond these capabilities, HARTING is constantly harnessing and refining its broad base of knowledge and experience to create new solutions that also ensure continuity. To secure its lead in know-how, HARTING draws on a wealth of sources from its in-house research and applications.

Salient examples of these sources of innovative knowledge include microstructure technologies, 3D design and connection technology,

high-temperature and ultrahigh-frequency applications that are finding use in telecommunications and automation networks, in the automotive industry, or in industrial sensor and actuator applications, RFID and wireless technologies, in addition to packaging and housing made of plastics, aluminum and stainless steel.

HARTING overcomes technological limitations.

Drawing on the comprehensive resources of the group's technology pool, HARTING devises practical solutions for its customers. Whether this involves industrial networks for manufacturing automation, or hybrid interface solutions for wireless telecommunication infrastructures, 3D circuit carriers with microstructures, or cable assemblies for high-temperature applications in the automotive industry - HARTING technologies offer not only components, but comprehensive solutions attuned to individual customer requirements and preferences. The range of cost-effective solutions covers ready-to-use cable configurations, completely assembled backplanes and board system carriers, as well as fully wired and tested control panels.

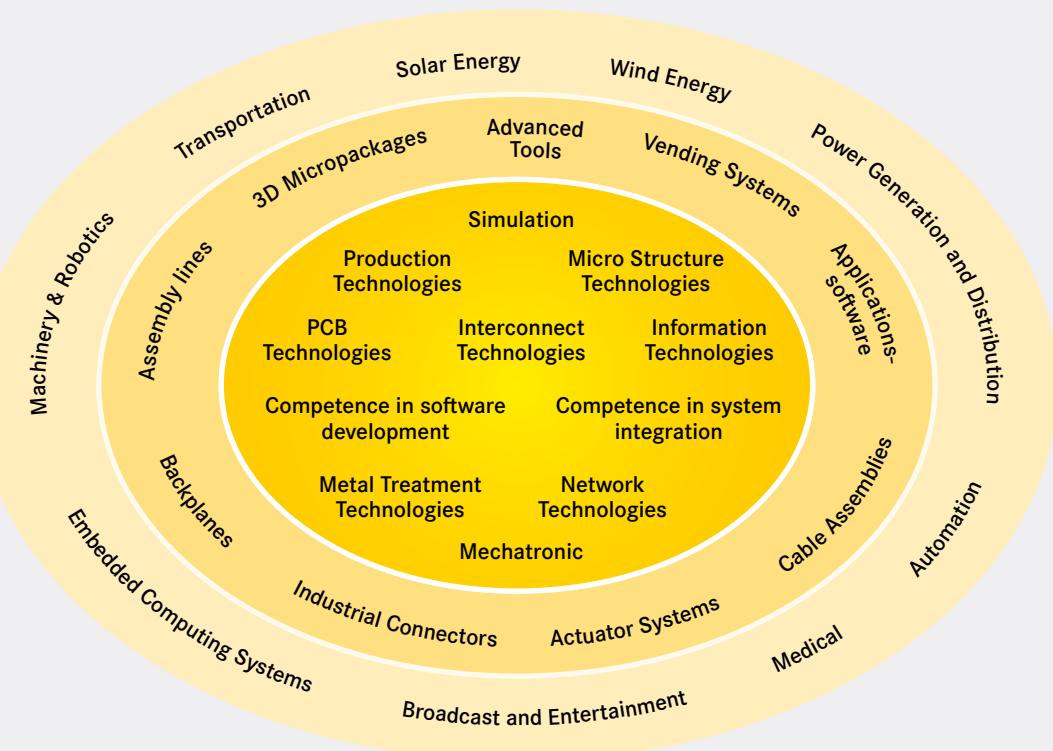

In order to ensure the future-proof design of RF and EMC-compatible interface solutions, the central HARTING laboratory (certified to EN 45001) employs simulation tools, as well as experimental, testing and diagnostics facilities all the way to scanning electron microscopes. In addition to product and process suitability considerations, lifecycle and environmental aspects play a key role in the selection of materials and processes.

HARTING's knowledge is practical know-how that generates synergy effects.

HARTING commands decades of experience with regard to the applications conditions involved in connections in telecommunications, computer, network and medical technologies, as well as industrial automation technologies, e.g. in the mechanical engineering and plant engineering areas, in addition to the power generation industry and the transportation sector. HARTING is

highly conversant with the specific application areas in all of these technology fields. In every solution approach, the key focus is on the application. In this context, uncompromising, superior quality is our hallmark. Every new solution found invariably flows back into the HARTING technology pool, thereby enriching our resources. And every new solution we go on to create will draw on this wealth of resources in order to optimize each and every individual solution. HARTING is synergy in action.

Smart Network Infrastructure

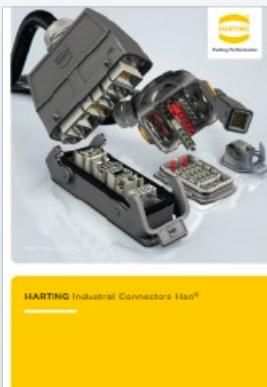

INTELLIGENT NETWORK SOLUTIONS

With its product series Ha-VIS, HARTING offers a consistent range of Ethernet network components and cabling products, which form the communication platform of convergent

automation IT networks. Under Ha-VIS HARTING offers fully integrated RFID solutions.

Installation Technology

INDUSTRIAL CONNECTORS Han®

This catalogue documents the worldwide standard for industrial connectors. Han® connectors represent the preferential solution in the cable-to-cable interconnection of data, signal and power

applications operating under the most demanding conditions and meeting stringent requirements with regard to safe and detachable electrical connections with high degree of protection IP65 / IP67. Installations making use of Han® connectors impress with their rugged design, convenient handling and modularity of data, signal and power connections. Han® connectors represent the worldwide standard in industry, railway technology, as well as in power generation and distribution.

Device Connectivity

DEVICE CONNECTIVITY

The Device Connectivity catalogue provides a universal, innovative product portfolio of PCB connections and of termination technology. The product range comprises board-to-

board and cable-to-board connectors for industrial electronic devices with degree of protection IP20 to IP65 / IP67. These HARTING solutions offer appropriate device connectivity for a wide range of devices, ranging from sensors to industrial computers and their respective data, signal and power interfaces.

You can find the **HARTING eCatalogue** at www.HARTING.com.

The screenshot shows the main navigation bar with links for Products, MyHARTING, Downloads / Catalogue order, Login / Register, Help, and Great Britain (English). Below the navigation is a grid of product categories:

- Industrial Connectors Han®**: Subcategories Product list (3057) >
- Ethernet Switches**: Subcategories Product list (198) >
- RFID**: Subcategories Product list (45) >
- PCB connectors**: Subcategories Product list (3756) >
- I/O Connectors**: Subcategories Product list (4621) >
- System cables and cable assemblies**: Subcategories Product list (1813) >
- System cable for distributed drive systems**: Subcategories Product list (30) >
- Tools**: Subcategories Product list (340) >
- HARTING Hall effect current sensors**: Subcategories Product list (20) >
- HARTING News**: Subcategories Product list (143) >

On the right side, there is a sidebar titled "Product configurator" with sections for Industrial Connectors, Han-Modular®, Han-Ethernet®, Han-Yellow®, DH 41 612, Ethernet Cables, Flat Cable Connectors, and SEW-EURODRIVE Connector Kits. At the bottom right is a link to "HARTING global website" and "Subsidiary location website".

The **HARTING eCatalogue** is an electronic catalogue with a product configurator. Here you can choose a connector according to your requirements. Afterwards you are able to send your inquiry directly to a HARTING sales partner. The drawings to every single part are available in PDF format. The parts are downloadable in 2D format (DXF) and 3D format (IGES, STEP). The 3D models can be viewed with a VRML-viewer.

Product configurator

General information

It is the customer's responsibility to check whether the components illustrated in this catalogue also comply with different regulations from those stated in special fields of applications.

We reserve the right to modify designs or substance of content in order to improve quality, keep pace with technological advancement or meet particular requirements in production.

No part of this catalogue may be reproduced in any form (print, photocopy, microfilm or any other process) or processed, duplicated or distributed by means of electronic systems without the prior written consent of HARTING Electric GmbH & Co. KG, Espelkamp. We are bound by the German version only.

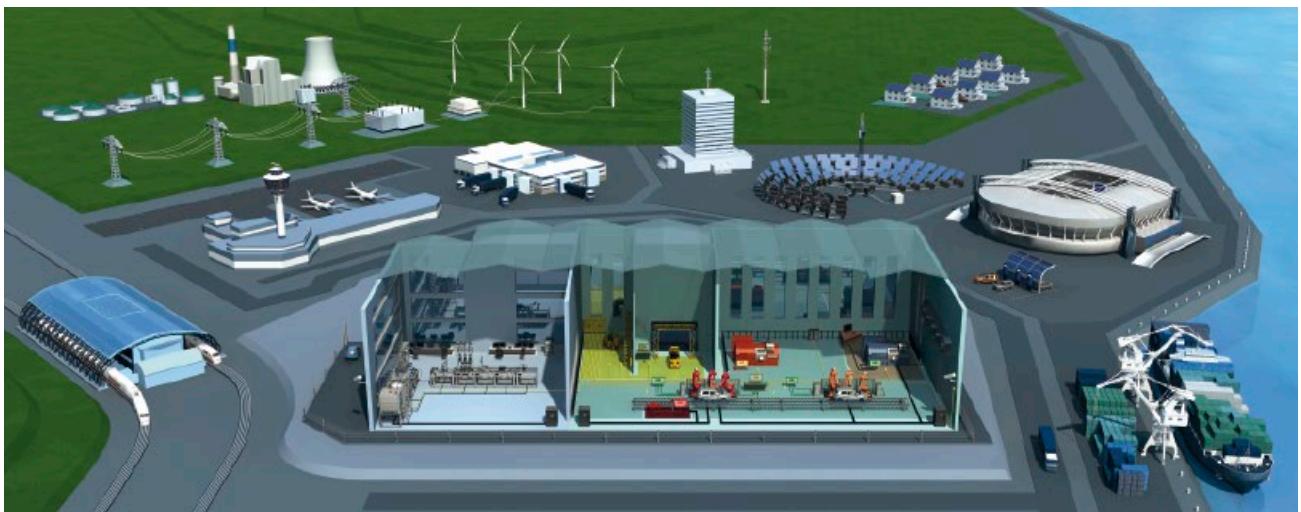

A Smart Network Infrastructure is the Key to Efficient Processes

Efficient industrial production processes require a convergent network infrastructure that serves as the platform for all enterprise applications. Only this makes it possible to seamlessly integrate all applications into a total value-creation process. HARTING has formulated this insight into our Automation IT vision.

The HARTING Technology Group has created a smart network infrastructure strategy in order to implement this vision. It transforms the data/signal network: from a pure configuration and combination of passive components into a key functional component of the modern process chain. Thus it is possible for multiple applications with varying service quality demands to simultaneously use the infrastructure.

HARTING's infrastructure solutions are targeted for industrial applications in the transportation, power generation and power distribution sectors. In all these sectors, the functional units are connected together in a similar way in order to maintain the three main application arteries – data, power and signal exchange. HARTING contributes the systems and components that are critical in keeping these arteries interconnected.

THE FUTURE OF INFRASTRUCTURE

Applications are being integrated into value-creation chains which are becoming more and more complex. In the past, each industrial sector had a proprietary specification for these main arteries. Now, however, the goal is to implement solutions which are portable and integrated. Ethernet is responsible for exchanging data between applications, since applications can be integrated into a complete system with this protocol.

During the development of a universal infrastructure platform, the HARTING Technology Group has played, and will continue to play, a central role.

Nowadays, Ethernet is being used for automation applications as well as classic IT – and it is establishing itself as a universal standard. However there are obstacles during the conversion from a Fieldbus infrastructure to an open Ethernet network, because the installation strategy and planning for an automation infrastructure is radically different than an IT application's infrastructure.

HARTING's Automation IT helps you to overcome these obstacles. Automation IT is responsible for the specifics of the Fieldbus-based infrastructure. It can therefore maintain the key automation requirements and still take advantage of innovative Ethernet technology.

Ethernet

CONVERT AND PRESERVE: A RECIPE FOR INFRASTRUCTURE SUCCESS

An infrastructure should have a long lifespan and ensure compatibility – but it should also keep your perspective open with its versatility and extensibility. Thus, an infrastructure has a seemingly contradictory character. It is structurally conservative – in a positive sense – because longevity and compatibility ensure the value of your investment. And infrastructure is also versatile, since there are challenging new tasks emerging for the future of automation.

So a converted infrastructure is used which allows the user to integrated existing technologies. The bridging technologies required for this topology are the actual key to these new infrastructure solutions. The HARTING Technology Group designs its own bridging technologies for Ethernet networking components, Ethernet cabling and RFID.

ACTIVE ETHERNET NETWORK COMPONENTS:

Optimized and designed for use in harsh industrial environments, the innovative portfolio provides unmanaged Plug & Play and full managed Ethernet switches. The degree of protection (IP30 to IP67) and connectivity (RJ45, M12, SC-D SFP) allow the use in all applications. Extensive software functions and powerful Power over Ethernet, allow the enhancement of existing network infrastructures and the development and construction of new systems. The field of application for the Ha-VIS switches is diverse, through approvals for the industry, the maritime market and traffic engineering, the switches can be optimally selected for each application.

ETHERNET CABLING:

HARTING's bridging solutions for adapter plugs are positioned at an entirely different level. At the transition from 2-pair to 4-pair cabling, HARTING's M12 connector – featuring Ha-VIS preLink® – serves as the bridging mechanism. This is also the foundation of our new *har*-speed M12 connector for PROFINET.

RFID:

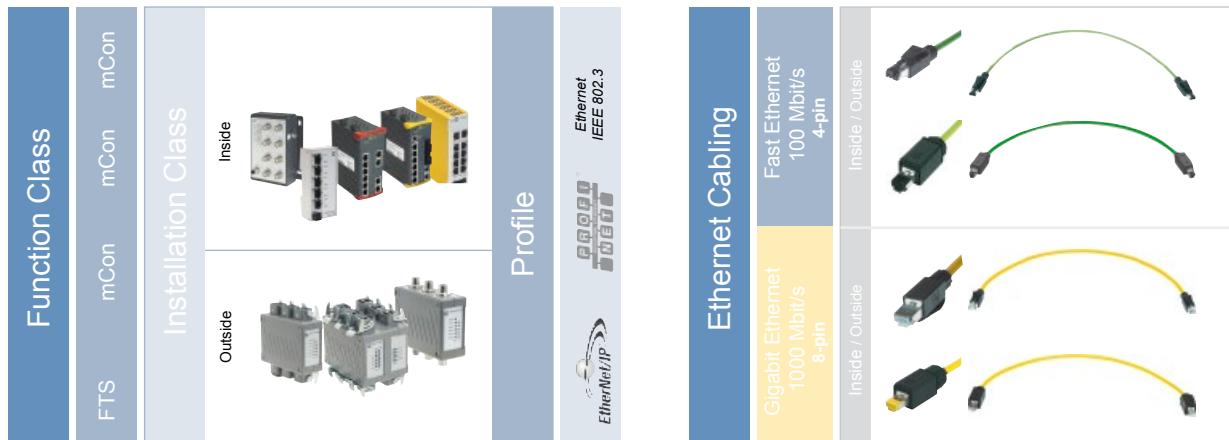

With RFID, HARTING has extended the classic data/power network to real world objects. In so doing, we have synchronized virtual and actual processes. Wireless or cable-bound sensors (such as those used for automotive identification, RFID or image recording) provide real-time data and signals emanating from many objects and process states.

HARTING provides a software platform that represents the link between the infrastructure zones (Dashboard). Our strategy in a convergent network is to give the user an universal software tool that allows him to see each application zone on the network separately.

ARRIVE AT A COMPLETE NETWORK IN JUST A FEW STEPS WITH THE SELECTION GUIDE

Our Selection Guide is a simple tool that provides you with a quick, reliable way to design an automation IT network that fits your requirements.

HARTING's Automation IT combines our services and products for passive network technology used in industrial applications.

The Selection Guide is divided into the Ethernet Switches and Ethernet Cabling chapters. The chapter on switches is sub-divided into sections describing functional classes and installation classes like protective degrees and interface-specific (profile) characteristics for each area of usage.

Various Ethernet cabling solutions exist for specific interfaces. Fast Ethernet uses four wires and up to 100 MBit/s while Gigabit Ethernet applications and other services use 8 wires.

These solutions follow structured cabling standards. HARTING offers different components that are optimized for various applications. When used together, they represent a perfect system solution for your industrial network.

Switching is typically used in a wide range of applications: for machinery, automation applications, renewable energy grids (for wind and solar), and for transportation equipment such as rail, bus, shipping and signalling.

The Selection Guide is divided into logical planning steps, so that you can quickly find the best components to build a reliable industrial network. The combination of the proper individual components results in a reliable network system that fits your requirements.

Our trio of installation technology, device connectivity and smart network infrastructure helps us to deliver state-of-the-art, custom-fit solutions to industrial customers around the globe.

5-year-service for Ethernet Switches and Network Components

HARTING's 5-year-service package provides you with additional protection beyond statutory warranty claims for HARTING Ethernet switches in the event of a product or workmanship defect.

HARTING Ethernet switches are optimally designed for scenarios in harsh industrial environments. High availability, network security and high reliability are the decisive technical characteristics necessary for the operation of an Ethernet network in industrial environments.

In order to provide even more protection beyond the time limits for statutory warranty claims, HARTING

Ethernet switches can now also be purchased together with a 5-year-service package. Plainly put, this means that within the first 5 years there will be no cost to you for repairs or replacement equipment in the event of a product or workmanship defect.

Note:

The General conditions for service package "5-year-service" for HARTING Ethernet Switches shall take precedence and apply to every order, delivery and use of this product. These terms and conditions are

applicable on www.HARTING.com/en/service. Please feel free to ask for providing you with print version by post.

Unmanaged Plug-and-Play Ethernet Switches
for Assembly on DIN Rail in Control Cabinets
Commercial Temp.: 0 °C ... +55 °C /
Industrial Temp.: -40 °C ... +70 °C
Power Sourcing Equipment (PSE)
with 4 Ports PoE+ (34.2 watts per port)

General description

Unmanaged Ethernet switches of the Ha-VIS eCon 2000 group enable cost-effective and quick extension or restructuring of network infrastructures. Owing to the extremely flat design, these switches can be accommodated in installations where space is restricted towards the cable connection at the front. The selection includes various combinations of variants with RJ45s and fibre optic cables. These switches are available with two different speeds: Fast Ethernet (FE) with a bandwidth of 100 Mbit/s and full gigabit Ethernet (Full GbE) with 1000 Mbit/s for applications requiring a high data transfer rate. Thanks to the PoE+ standard, our switches enable end devices to be supplied with energy. There is a wide range of application areas for Ha-VIS eCon switches. Approvals for the industrial market, including the maritime sector and the transportation sector, enable the optimum selection of switches for any application.

Features

- Fast and full gigabit Ethernet, non-blocking switch architecture in accordance with IEEE 802.3
- Industrial temperature range from -40 °C up to +70 °C
- Support of auto-negotiation, auto-polarity, auto-MDI(X)
- Support of jumbo frames (10 kbytes)
- Variants with RJ45s, SC multi-mode fibres and single-mode fibres
- Energy supply of up to 4 end device via PoE+ (137 watts) in accordance with IEEE 802.3at
- Minimum energy consumption owing to energy-efficient Ethernet in accordance with IEEE 802.3az
- IP30 aluminium enclosures
- Wide range voltage supply, 24/48 V DC
- Surge protection and reverse voltage protection
- Extensive diagnostic options via LED displays at the front

Advantages

- Plug-and-Play switch, without time-consuming configuration and therefore easy and quick start-up
- Maximum data transfer rate without restrictions, even if all ports are in use
- Fault-tolerant owing to automatic recognition of data transfer rate and cable wiring
- High MTBF durations ensure secure and reliable operation
- Flat design with low installation depth
- Easy and quick connection of data transfer cables

Field of application

- Mechanical engineering & robotics
- Automation technology
- Industrial network infrastructures
- Solar energy
- Wind energy
- Transportation
- Shipbuilding

Technical characteristics

Switch Features

Switch type	Unmanaged Ethernet Switch
Supported standards	IEEE 802.3
Support of jumbo frames	Yes (Full Gigabit Ethernet Basic) No (Fast Ethernet Basic)
Non-blocking	Yes
PROFINET compatible	Yes
EthernetIP compatible	Yes
Frame Size	1552 bytes (Fast Ethernet Basic) 10 kbytes (Full Gigabit Ethernet Basic)
Quality of Service	Yes
Energy Efficient Ethernet	Yes

Ethernet Ports Twisted Pair

Transfer standard	10BASE-Te / 100BASE-TX EEE; (Fast Ethernet Basic) 10BASE-Te / 100BASE-TX EEE / 1000BASE-T EEE; (Full Gigabit Ethernet Basic)
Auto-Negotiation	Yes
Auto-Polarity	Yes
Auto-MDI(X)	Yes
Transfer length	100 m (Twisted Pair, Cat 5)

Ethernet ports, fibre optic cables

Transfer standard	100BASE-FX (Fast Ethernet Basic) 1000BASE-LX (Full Gigabit Ethernet Basic)
Wavelength	1310 nm (MM / SM); (Fast Ethernet Basic) 850 nm (MM) / 1310 nm (SM); (Full Gigabit Ethernet Basic)
Output capacity in dBm	-19 dBm ... -14 dBm (MM) / -15 dBm ... -8 dBm (SM); (Fast Ethernet Basic) -9.5 dBm ... -4 dBm (MM) / -9.5 dBm ... -3 dBm (SM); (Full Gigabit Ethernet Basic)
Receiver sensitivity	≤ -32 dBm (MM) / ≤ -34 dBm (SM); (Fast Ethernet Basic) ≤ -17 dBm (MM) / ≤ -21 dBm (SM); (Full Gigabit Ethernet Basic)

Status and diagnostic displays (Switch and Ports)

Power  lit green	Supply voltage is applied
Link/Activity ("L/A") off	No link
Link/Activity ("L/A") lit green	Link is active
Link/Activity ("L/A") flashes green	Link is active and data is transferred
Link speed ("Spd") off	10 Mbit/s
Link speed ("Spd") lit yellow	100 Mbit/s
Link speed ("Spd") lit green	1000 Mbit/s (Full Gigabit Ethernet Basic)
PoE  off	PoE is inactive / low voltage
PoE  lit green	Voltage in PoE range
PoE  lit blue	Voltage in PoE+ range
PoE  lit red	Fault (see manual)

Technical characteristics

Power supply

Surge protection	Yes
Overcurrent protection at input	Yes
Reverse polarity proof	Yes

Power over Ethernet PoE

Standard	IEEE 802.3af / IEEE 803.3at
Supported mode	Alternative A
Power supply PSE (PoE/PoE+)	48 / 54 VDC ==
Supported cabling	See 802.3at, section 33.1.4
PoE Pinout	Alternative A, MDI-X (1/2 = V-, 3/6 = V+)

Enclosures

Type of installation	35 mm DIN rail acc. to EN 60 715
Material enclosures	Anodised aluminium
Protection degree	III
Protection degree acc. to DIN EN 60 529 (with plugged screw type terminal block)	IP30

Ambient conditions

Commercial temperature range	0 °C ... +55 °C
Industrial temperature range	-40 °C ... +70 °C
Storage temperature range	-40 °C ... +85 °C
Relative humidity (operation)	0 % ... 95 % (not-condensing)
Relative humidity (storage/transport)	0 % ... 95 % (not-condensing)
Air pressure	2000 m (795 hPa)

Included in delivery

Pluggable screw contact for power supply	Yes
Operating manual	Yes

Unmanaged Plug-and-Play Ethernet Switches

for Assembly on DIN Rail in Control Cabinets

Commercial Temp.: 0 °C ... +55 °C / Industrial Temp.: -40 °C ... +70 °C

Specification

Number of ports copper / termination	3 x 10BASE-T / 100BASE-TX EEE / RJ45 (twisted pair)
Nominal voltage	24 / 48 VDC =
Permissible voltage range	9 V ... 60 VDC =
Termination	Screw type terminal block, pluggable, 3-poles (+ / - / \ominus)
Current consumption typical @ 24 V / 48 V	32 mA / 17 mA
Dimensions (W x H x D)	46.5 x 113.5 x 27.3 mm (without pluggable screw type terminal block)
Weight	162 g
MTBF in million hours	3.13
Approvals	CE FCC CFR 47 Part 15, cUL US 508 listed, E1, Det Norske Veritas (DNV), Germanischer Lloyd (GL), American Bureau of Shipping (ABS), Nippon Kaiji Kyokai (NK)

Identification	Part number	Drawing	Dimensions in mm
Ha-VIS eCon 2030B-A 0 °C ... +55 °C	24 02 003 0010

Unmanaged Plug-and-Play Ethernet Switches

for Assembly on DIN Rail in Control Cabinets

Commercial Temp.: 0 °C ... +55 °C / Industrial Temp.: -40 °C ... +70 °C

Specification

Number of ports copper / termination	4 x 10BASE-T / 100BASE-TX EEE / RJ45 (twisted pair)
Nominal voltage	24 / 48 VDC =
Permissible voltage range	9 V ... 60 VDC =
Termination	Screw type terminal block, pluggable, 3-poles (+ / - / \ominus)
Current consumption typical @ 24 V / 48 V	37 mA / 20 mA
Dimensions (W x H x D)	46.5 x 113.5 x 27.3 mm (without pluggable screw type terminal block)
Weight	166 g
MTBF in million hours	2.99
Approvals	CE FCC CFR 47 Part 15, cUL US 508 listed, E1, Det Norske Veritas (DNV), Germanischer Lloyd (GL), American Bureau of Shipping (ABS), Nippon Kaiji Kyokai (NK)

Ha-VIS eCon 2000 Full Gigabit Ethernet Basic PoE

Unmanaged Plug-and-Play Ethernet Switches

for Assembly on DIN Rail in Control Cabinets

Commercial Temp.: 0 °C ... +55 °C / Industrial Temp.: -40 °C ... +70 °C

Power Sourcing Equipment (PSE) with 4 Ports PoE+ (34.2 watts per port)

Specification

Number of ports copper / termination, including PoE+ ports	7 x 10BASE-Te / 100BASE-TX EEE / 1000BASE-T EEE / RJ45 (twisted pair) 4 x PoE+ with 34.2 watts per port
Nominal voltage (without PoE / PoE / PoE+)	24 / 48 / 54 VDC ==
Permissible voltage range	9 V ... 60 VDC ==
Termination	Screw type terminal block, pluggable, 3-poles (+ / - / \ominus)
Current consumption typical @ 24 V / 48 V / 54 V	0.19 A / 1.47 A / 2.45 A
Dimensions (W x H x D)	120.0 x 113.5 x 27.3 mm (without pluggable screw type terminal block)
Weight	427 g
MTBF in million hours	0.98
Approvals	CE FCC CFR 47 Part 15, cUL US 508 listed, Det Norske Veritas (DNV), Germanischer Lloyd (GL), American Bureau of Shipping (ABS), Nippon Kaiji Kyokai (NK)

Identification	Part number	Drawing	Dimensions in mm

**Ethernet Switch
Ha-VIS eCon 2160-A**
16-port Ethernet Switch for flat mounting
onto top-hat mounting rail in control cabinets

Specification

Number of ports, Copper / Termination	16x 10/100Base-T(X) / RJ45 (Twisted Pair)
Input voltage / Termination	24 V DC / 5-pole, pluggable screw contact, redundant (PWR1 + / PWR1 - / PWR2 + / PWR2 - / FE)
Permissible range (min./max.)	9.6 V ... 60 V DC
Input current	approx. 220 mA (at 24 V DC)
Housing material	aluminium, anodised
Dimensions (W x H x D)	120 x 105 x 25.5 mm (without connectors)
Weight	approx. 0.4 kg
Working temperature	-10 °C ... +70 °C
MTBF	1.150.000 h
Approvals	cUL US 508 listed

Identification	Part number	Drawing	Dimensions in mm
Ha-VIS eCon 2160-A Ethernet Switch with 16 RJ45 ports	20 76 116 3000		

Unmanaged Plug-and-Play Ethernet Switches
for Assembly on DIN Rail in Control Cabinets
Commercial Temp.: 0 °C ... +55 °C /
Industrial Temp.: -40 °C ... +70 °C
Power Sourcing Equipment (PSE)
with 4 Ports PoE+ (34.2 watts per port)
Integrated 24 / 54 V DC Voltage Transformer

General description

Unmanaged Ethernet switches of the Ha-VIS eCon 3000 group enable cost-effective and quick extension or restructuring of network infrastructures. The slender design of the switches enables an extremely high packing density on the DIN rail. The selection includes various combinations of variants with RJ45s and fibre optic cables. These switches are available with two different speeds: Fast Ethernet (FE) with a bandwidth of 100 Mbit/s and full gigabit Ethernet (Full GbE) with 1000 Mbit/s for applications requiring a high data transfer rate. Thanks to the PoE+ standard, our switches enable end devices to be supplied with energy. Likewise, variants with an integrated DC/DC transformer enable the use of 24 V as supply voltage and hence help to keep cabling expenses to a minimum, saving time and money. There is a wide range of application areas for Ha-VIS eCon switches. Approvals for the industrial market, including the maritime sector and the transportation sector, enable the optimum selection of switches for any application.

Features

- Fast and full gigabit Ethernet, non-blocking switch architecture in accordance with IEEE 802.3
- Industrial temperature range from -40 °C up to +70 °C
- Support of auto-negotiation, auto-polarity, auto-MDI(X)
- Support of jumbo frames (10 kbytes)
- Variants with RJ45s, SC multi-mode fibres, single-mode fibres and SFP
- Energy supply of up to 4 end device via PoE+ (137 watts) in accordance with IEEE 802.3at
- Minimum energy consumption owing to energy-efficient Ethernet, IEEE 802.3az
- IP30 aluminium/steel sheet enclosure
- Wide range voltage supply, 24/48 V DC
- Surge protection and reverse voltage protection
- Extensive diagnostic options via LED displays at the front
- Optimised DIN rail bracket

Advantages

- Plug-and-Play switch, without time-consuming configuration and therefore easy and quick start-up
- Maximum data transfer rate without restrictions, even if all ports are in use
- Fault-tolerant owing to automatic recognition of data transfer rate and cable wiring
- High MTBF durations ensure secure and reliable operation
- Slender design for high packing density
- Use of PoE+ with 24 V DC supply (isolated)
- Easy and quick connection of data transfer cables

Field of application

- Mechanical engineering & robotics
- Automation technology
- Industrial network infrastructures
- Solar energy
- Wind energy
- Transportation
- Shipbuilding

Technical characteristics

Switch Features

Switch type	Unmanaged Ethernet Switch
Supported standards	IEEE 802.3
Support of jumbo frames	No (Fast Ethernet Basic) Yes (Full Gigabit Ethernet Basic)
Non-blocking	Yes
PROFINET compatible	Yes
EthernetIP compatible	Yes
Frame Size	1522 bytes (Fast Ethernet Basic) 10 kbytes (Full Gigabit Ethernet Basic)
Quality of Service	Yes
Energy Efficient Ethernet	Yes

Ethernet Ports Twisted Pair

Transfer standard	10BASE-Te / 100BASE-TX EEE; (Fast Ethernet Basic) 10BASE-Te / 100BASE-TX EEE / 1000BASE-T EEE; (Full Gigabit Ethernet Basic)
Auto-Negotiation	Yes
Auto-Polarity	Yes
Auto-MDI(X)	Yes
Transfer length	100 m (twisted pair, Cat 5)

Ethernet ports, fibre optic cables

Transfer standard	100BASE-FX (Fast Ethernet Basic) 1000BASE-SX (MM) / 1000BASE-LX (SM); (Full Gigabit Ethernet Basic)
Wavelength	1310 nm (Fast Ethernet Basic) 850 nm (MM) / 1310 nm (SM); (Full Gigabit Ethernet Basic)
Output capacity in dBm	-20 dBm ... -14 dBm (MM) / -15 dBm ... -8 dBm (SM); (Fast Ethernet Basic) -9.5 dBm ... -4 dBm (MM) / -9.5 dBm ... -3 dBm (SM); (Full Gigabit Ethernet Basic)
Receiver sensitivity	≤ -30 dBm (MM) / ≤ -32 dBm (SM); (Fast Ethernet Basic) ≤ -17 dBm (MM) / ≤ -21 dBm (SM); (Full Gigabit Ethernet Basic)

Ethernet ports, SFP

Transfer standard	Depending on used SFP
Termination	Depending on used SFP, RJ45 or LC
Transfer conditions	Depending on used SFP, twisted pair or optical fibre cable
Transfer speed	Depending on used SFP, 100 or 1000 Mbit/s
Transfer length	Depending on used SFP

Status and diagnostics displays (Switch and Ports)

Power lit green	Supply voltage is applied
Link/Activity ("L/A") off	No link
Link/Activity ("L/A") lit green	Link is active
Link/Activity ("L/A") flashes green	Link is active and data is transferred
Link speed ("Spd") off	10 Mbit/s
Link speed ("Spd") lit yellow	100 Mbit/s
Link speed ("Spd") lit green	1000 Mbit/s (Full Gigabit Ethernet Basic)
PoE off	PoE is inactive / low voltage
PoE lit green	Voltage in PoE range
PoE lit blue	Voltage in PoE+ range
PoE lit red	Fault (see manual)

Technical characteristics

Power supply

Surge protection	Yes
Overcurrent protection at input	Yes
Reverse polarity proof	Yes

Power over Ethernet PoE

Standard	IEEE 802.3af / IEEE 803.3at
Supported mode	Alternative A
Power supply PSE (PoE/PoE+)	48 / 54 VDC == 24 VDC with integrated Voltage Transformer
Supported cabling	See 802.3at, section 33.1.4
PoE Pinout	Alternative A, MDI-X (1/2 = V-, 3/6 = V+)

Enclosures

Type of installation	35 mm DIN rail acc. to EN 60 715
Material enclosures	Anodised aluminium / Powder-coated steel sheet
Protection degree	III
Protection degree acc. to DIN EN 60 529 (with plugged screw type terminal block)	IP30

Ambient conditions

Commercial temperature range	0 °C ... +55 °C
Industrial temperature range	-40 °C ... +70 °C
Storage temperature range	-40 °C ... +85 °C
Relative humidity (operation)	0 % ... 95 % (not-condensing)
Relative humidity (storage/transport)	0 % ... 95 % (not-condensing)
Air pressure	2000 m (795 hPa)

EMC and environmental conditions

EMC interference immunity (EN 61 000-6-1, 61 000-6-2, 55204)	Electrostatic discharge (ESD) EN 61 000-4-2 Electromagnetic field EN 61000-4-3 Rapid transients (burst) EN 61 000-4-4 Surge voltages EN 61 000-4-5 Conducted interference voltages EN 61 000-4-6 EN 61 000-6-4, EN 55 022, FCC CFR 47 Part 15 IEC 60068-2-6 Vibration IEC 60068-2-6 Vibration resonance search IEC 60068-2-27 Shock test
EMC interference emission Mechanical stability (EN 60721-3)	

Included in delivery

Pluggable screw type terminal block for power supply	Yes
Operating manual	Yes

Unmanaged Plug-and-Play Ethernet Switches

for Assembly on DIN Rail in Control Cabinets

Commercial Temp.: 0 °C ... +55 °C / Industrial Temp.: -40 °C ... +70 °C

Specification

Number of ports copper / termination	6 x 10BASE-Te / 100BASE-TX EEE / RJ45 (twisted pair)
Nominal voltage	24 / 48 VDC =
Permissible voltage range	9 V ... 60 VDC =
Termination	Screw type terminal block, pluggable, 3-poles (+ / - / \ominus)
Current consumption typical @ 24 V / 48 V	75 mA / 40 mA
Dimensions (W x H x D)	25.0 x 142.0 x 107.5 mm (without pluggable screw type terminal block)
Weight	430 g
MTBF in million hours	2.29
Approvals	CE FCC CFR 47 Part 15, cUL US 508 listed, E1, Det Norske Veritas (DNV), Germanischer Lloyd (GL), American Bureau of Shipping (ABS), Nippon Kaiji Kyokai (NK)

Ha-VIS eCon 3000 Fast Ethernet Basic PoE

Unmanaged Plug-and-Play Ethernet Switches

for Assembly on DIN Rail in Control Cabinets

Commercial Temp.: 0 °C ... +55 °C / Industrial Temp.: -40 °C ... +70 °C

Power Sourcing Equipment (PSE) with 4 Ports PoE+ (34.2 watts per port)

Specification

Number of ports copper / termination including PoE+ ports	6 x 10BASE-Tx / 100BASE-TX EEE / RJ45 (twisted pair) 4 x PoE+ with 34.2 watts per port
Number of ports F.O. / termination	1 x 100BASE-FX / SC duplex socket
Nominal voltage (without PoE / PoE / PoE+)	24 / 48 / 54 VDC =
Permissible voltage range	9 V ... 60 VDC =
Termination	Screw type terminal block, pluggable, 3-poles (+ / - / \ominus)
Current consumption typical @ 24 V / 48 V / 54 V	0.13 A / 1.43 A / 2.42 A
Dimensions (W x H x D)	25.0 x 142.0 x 107.5 mm (without pluggable screw type terminal block)
Weight	493 g - 499 g
MTBF in million hours	1.15
Approvals	CE FCC CFR 47 Part 15, cUL US 508 listed, Det Norske Veritas (DNV), Germanischer Lloyd (GL), American Bureau of Shipping (ABS), Nippon Kaiji Kyokai (NK)

Identification	Part number	Drawing	Dimensions in mm

Unmanaged Plug-and-Play Ethernet Switches

for Assembly on DIN Rail in Control Cabinets

Commercial Temp.: 0 °C ... +55 °C / Industrial Temp.: -40 °C ... +70 °C

Power Sourcing Equipment (PSE) with 4 Ports PoE+ (34.2 watts per port)

Integrated 24 / 54 V DC Voltage Transformer

Specification

Number of ports copper / termination including PoE+ ports	5 x 10BASE-Te / 100BASE-TX EEE / 1000BASE-T EEE RJ45 (twisted pair) 4 x PoE+ with 34.2 watts per port
Nominal voltage	24 VDC =
Permissible voltage range	18 V ... 60 VDC =
Termination	Screw type terminal block, pluggable, 3-poles (+ / - / \ominus)
Current consumption typical @ 24 V / 48 V	See eCatalogue
Dimensions (W x H x D)	60.0 x 142.0 x 107.5 mm (without pluggable screw type terminal block)
Weight	See eCatalogue
MTBF in million hours	See eCatalogue
Approvals	CE
Approvals (in preparation)	FCC CFR 47 Part 15, cUL US 508 listed, Det Norske Veritas (DNV), Germanischer Lloyd (GL), American Bureau of Shipping (ABS), Nippon Kaiji Kyokai (NK)

Ethernet Media converter

Ha-VIS eCon 3000

Ethernet Media converter for vertical installation in control cabinets, including 1 F.O. port

General description

The Fast Ethernet Media converter Ha-VIS eCon 3011 of the product family Ha-VIS eCon 3000 is suitable for industrial applications and support both Ethernet (10 Mbit/s) and Fast Ethernet (100 Mbit/s). The Mediaconverter enables the conversion from Twisted Pair cables to fiber-optic cables (Multimode and Singlemode).

The Ha-VIS eCon 3011 Media converter is configurable via Dip switch and offers a variety of control functions.

The Media converter has two operating modes:

In the switch mode, it operates as an unmanaged Ethernet Switch with Store and Forward Switching which supports asynchronous data communication, Auto-crossing and Auto-negotiation.

In the converter mode, it works with a data rate of 100 Mbit/s (Full duplex). The latency is very low in this operation mode.

Features

- Auto-crossing
- Auto-negotiation
- Auto-polarity
- Store and Forward Switching Mode

Advantages

- Power over Ethernet (IEEE 802.3af)
- Configuration via Dip switch
- Small housing
- Robust metal housing
- Adapted for mounting onto top-hat mounting rail 35 mm according to EN 60 715

Application fields

- Industrial automation
- Automotive industry
- Wind power
- Power distribution systems

Technical characteristics Media converter

Ethernet interface – RJ45

Number of ports	1x 10/100Base-T(X)
Cable types according to IEEE 802.3	Shielded Twisted Pair (STP) or Unshielded Twisted Pair (UTP), Category 5
Data rate	10 Mbit/s or 100 Mbit/s (RJ45)
Repeater class	Class II (latency: 860 ns in converter mode)
Maximum cable length	100 m (Twisted Pair, with cable Category 5 acc. to DIN EN 50 173-1)
Termination	RJ45 (Twisted Pair)
Diagnostics (LED)	<ul style="list-style-type: none"> • Status Link - Green • Data transfer (Act) - Green flashing • Data transfer rate (Speed) - 100 Mbit/s: Yellow 10 Mbit/s: OFF • Duplex - Full duplex: Yellow Half duplex: OFF • PoE (Power Source Equipment) (PSE) - Green
Topology	<ul style="list-style-type: none"> • Line • Star • mixed

Power supply

Input voltage	24 V DC (12 V ... 30 V DC) - redundant
Input voltage, mode PoE	48 V DC (46 V ... 57 V DC) - redundant
Termination	5-pole, pluggable screw contact, redundant (PWR1 + / PWR1 - / PWR2 + / PWR2 - / FE)
Diagnostics (LED)	Power supply - LED Green

Configuration

Configuration via Dip switch:
 Mode, Auto-negotiation, Data rate, Duplex TP, Duplex FX,
 Link monitoring, PoE (PSE)

Design features

Housing material	metal
Dimensions (W x H x D)	23 x 130 x 100 mm (without connectors)
Degree of protection acc. to DIN EN 60 529	IP30
Assembly	35 mm top-hat rail acc. to EN 60 715
Weight	approx. 0.6 kg

Environmental conditions

Stock temperature	-40 °C ... +85 °C
Relative humidity	10 % ... +95 % (non-condensing)

Technical characteristics Media converter F.O. termination

Ethernet interface – F.O.

Ethernet Media converter

Ha-VIS eCon 3011-AD

2-port Ethernet Media converter for vertical installation in control cabinets,
including 1 F.O. port (SC, MM)

Unmanaged	IP30	PROFINET compatible	<input checked="" type="checkbox"/>	EtherNet/IP compatible	<input checked="" type="checkbox"/>
Number of ports, Copper / Termination		1x 10/100Base-T(X) / RJ45 (Twisted Pair) PoE support			
Number of ports, F.O. / Termination		1x 100Base-FX / SC-D female			
mode PoE					
Input voltage / Termination		48 V DC			
Permissible range (min./max.)		46 V ... 57 V DC			
Input current		approx. 100 mA ... 400 mA at 48 V DC with PoE			
mode Non-PoE					
Input voltage / Termination		24 V DC / 5-pole, pluggable screw contact, redundant (PWR1 + / PWR1 - / PWR2 + / PWR2 - / FE)			
Permissible range (min./max.)		12 V ... 30 V DC			
Input current		approx. 100 mA (at 24 V DC)			
Housing material					
Dimensions (W x H x D)		metal, powder-coated			
Weight		23 x 130 x 100 mm (without connectors)			
Working temperature		approx. 0.6 kg			
Approvals		-40 °C ... +70 °C			
MTBF		cUL (in preparation)			
		2.055.000 h			

Identification	Part number	Drawing	Dimensions in mm
Ha-VIS eCon 3011-AD Ethernet Switch with 1 RJ45 port 1 F.O. port	20 76 102 3100		

Ethernet Media converter

Ha-VIS eCon 3011-ASFP

2-port Ethernet Media converter for vertical installation in control cabinets,
including 1 F.O. port (SFP)

Unmanaged	IP30	PROFINET compatible	<input checked="" type="checkbox"/>	EtherNet/IP compatible	<input checked="" type="checkbox"/>
Number of ports, Copper / Termination		1x 10/100Base-T(X) / RJ45 (Twisted Pair)			
Number of ports, F.O. / Termination		PoE support 1x 100Base-FX / SFP module slot			
mode PoE					
Input voltage / Termination		48 V DC			
Permissible range (min./max.)		46 V ... 57 V DC			
Input current		approx. 100 mA ... 400 mA at 48 V DC with PoE			
mode Non-PoE					
Input voltage / Termination		24 V DC / 5-pole, pluggable screw contact, redundant (PWR1 + / PWR1 - / PWR2 + / PWR2 - / FE)			
Permissible range (min./max.)		12 V ... 30 V DC			
Input current		approx. 100 mA (at 24 V DC)			
Housing material		metal, powder-coated			
Dimensions (W x H x D)		23 x 130 x 100 mm (without connectors)			
Weight		approx. 0.6 kg			
Working temperature		-40 °C ... +70 °C			
Approvals		cUL (in preparation)			
MTBF		2.090.000 h			

Identification	Part number	Drawing	Dimensions in mm
Ha-VIS eCon 3011-ASFP Ethernet Switch with 1 RJ45 port 1 F.O. port	20 76 102 3101		

Ha-VIS MK3000 Cover

Features

- Mounting cover for use with HARTING mounting adapter
- Fixing of Ha-VIS eCon 3000 Ethernet switches on the mounting adapter
- Mounting adapter must be ordered separately for the right housing width:
 - Ha-VIS MK3000 Wall
 - Ha-VIS MK3000 DINV
 - Ha-VIS MK3000 DINH

Technical characteristics

- | | |
|------------|----------------|
| • Material | Steel (1.5 mm) |
| • Surface | Galvanized |

Identification	Part number	Drawing	Dimensions in mm
Ha-VIS MK3000 Cover25 For switches with 25 mm width	24 98 100 0000		
Ha-VIS MK3000 Cover38 For switches with 38 mm width	24 98 100 0001		
Ha-VIS MK3000 Cover60 For switches with 60 mm width	24 98 100 0002		182 119,8

Ha-VIS MK3000 Wall
 Ha-VIS MK3000 DINV
 Ha-VIS MK3000 DINH

Features

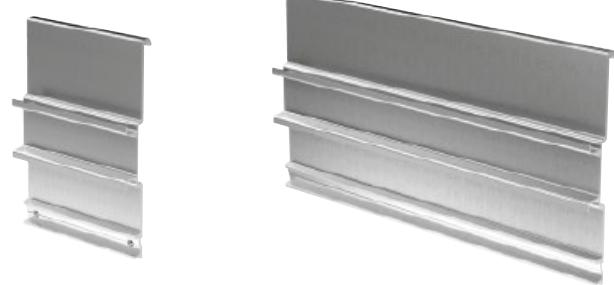

- Mounting adapter for use with Ha-VIS eCon 3000 Ethernet Switches
- Easy mounting of DIN rail switches on walls
- Flat mounting on DIN rail with port orientation to the side (vertical)
- Flat mounting on DIN rail with port orientation downwards (horizontal)
- Integrated cable manager, for direct fixing the data cable close to the switch, improves the stability and the shock and vibration performance

Technical characteristics

- | | |
|------------|----------------|
| • Material | Steel (1.5 mm) |
| • Surface | Galvanized |

Identification	Part number	Drawing	Dimensions in mm
Ha-VIS MK3000 Wall Flat wall mounting	24 98 100 0003

Ha-VIS MK3000 DINH Flat DIN rail mounting, horizontal	24 98 100 0005		

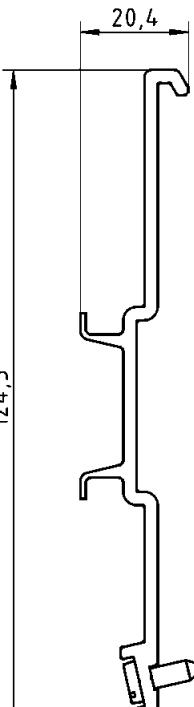

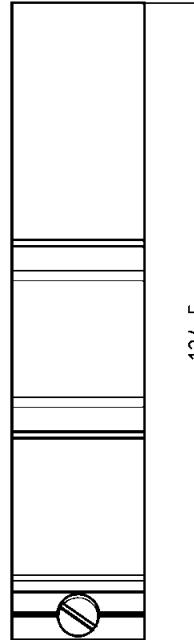

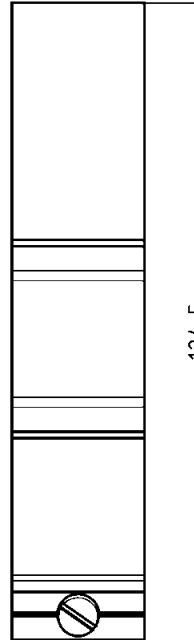

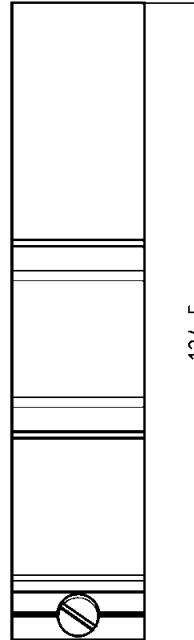

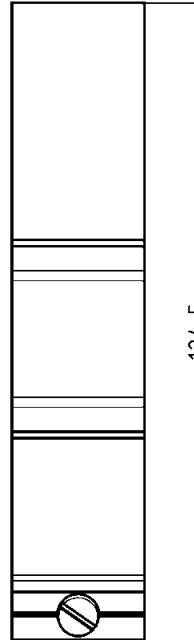

Ha-VIS MK3000 S7
S7 profile rail

Features

- Mounting of Ha-VIS eCon / mCon Ethernet switches on a S7-300 rail
 - Mounting adapter can be used for all DIN rail mountable devices
 - Adapter will be mounted on the S7-300 mounting rail and secured with screws
 - The adapter is available in different widths

Technical characteristics

Ha-VIS MK3000 S7120 S7 profile rail 120 mm	24 98 100 0014		

Ethernet Switch

Ha-VIS eCon 4000

Ethernet Switches, unmanaged, for flat wall mounting

General description

The Fast Ethernet Switches of the product family Ha-VIS eCon 4000 are recommended for use in the widest range of industrial applications and support both Ethernet (10 Mbit/s) and Fast Ethernet (100 Mbit/s). The product family enables the connection of up to 8 network devices over Twisted Pair cables.

The robust M12 interface shows its advantages especially in applications at risk of vibrations.

The Ha-VIS eCon 4000 Ethernet Switch product family, with its integrated LEDs, supports fast and easy network diagnosis. The Ha-VIS eCon Ethernet Switch operates as an unmanaged Switch in Store and Forward Switching Mode and supports Auto-crossing, Auto-negotiation and Auto-polarity.

Features

- Ethernet Switch according to IEEE 802.3
- Ethernet (10 Mbit/s) and Fast Ethernet (100 Mbit/s)
- Auto-crossing, Auto-negotiation, Auto-polarity
- Diagnostic LEDs (Link Status, Data, Power)
- Store and Forward Switching Mode
- Mounting onto wall, optionally onto top-hat mounting rail

For Ethernet Switch Ha-VIS eCon 4080-BPoE1 only:

- PoE support

Advantages

- Robust metal housing and flat housing style
- EMC, temperature range and mechanical stability meet the toughest demands
- Wide range for power supply input
- Additional type test according to EN 50 155 and EN 50 121-3-2

Application fields

- Railway applications
- Industrial automation
- Automotive industry
- Wind power

Technical characteristics

Ethernet interface – M12

Number of ports	8x 10/100Base-T(X)
Cable types according to IEEE 802.3	Shielded Twisted Pair (STP) or Unshielded Twisted Pair (UTP), Category 5
Data rate	10 Mbit/s or 100 Mbit/s (M12 D-coding)
Maximum cable length	100 m (Twisted Pair, with cable Category 5 acc. to DIN EN 50 173-1)
Termination	M12 D-coding
Diagnostics (LED)	<ul style="list-style-type: none"> • Status Link - Green • Data transfer (Act) - Green flashing • Data transfer rate (Speed) - 100 Mbit/s: Yellow 10 Mbit/s: Green
Topology	<ul style="list-style-type: none"> • Line • Star • mixed

Power supply

Input voltage	24 / 48 V DC (12 V ... 60 V DC) - redundant
Termination	M12 A-coding, male, for redundant power supply
Diagnostics (LED)	Power supply - LED Green

Design features

Housing material	metal
Dimensions (W x H x D)	130 x 166 x 50 mm (without connectors)
Degree of protection acc. to DIN EN 60 529	IP40
Assembly	Wall mounting, flat assembly
Weight	approx. 0.85 kg

Environmental conditions

Stock temperature	-40 °C ... +85 °C
Relative humidity	10 % ... +95 % (non-condensing)

Technical characteristics Ha-VIS eCon 4080-BPoE1

Ethernet interface – M12

Number of ports	8x 10/100Base-T(X)
Cable types according to IEEE 802.3	Shielded Twisted Pair (STP) or Unshielded Twisted Pair (UTP), Category 5
Data rate	10 Mbit/s or 100 Mbit/s (M12 D-coding)
Maximum cable length	100 m (Twisted Pair, with cable Category 5 acc. to DIN EN 50 173-1)
Termination	M12 D-coding

Ethernet Switch

Ha-VIS eCon 7000

Ethernet Switches, unmanaged, for use in harsh industrial environments

General description

The Ethernet Switches of the product family Ha-VIS eCon 7000 allow, according to type, the connection of up to 10 end units in industrial networks.

Protection class, temperature range and mechanical stability meet the highest demands. These Ethernet Switches can therefore be used directly in industrial environments.

Through their use, a reduction of cabling costs in the construction of industrial networks will be achieved. The Ethernet Switches facilitate any kind of network configuration. All connections are plugged, which ensures that assembly and disassembly is fast and reliable.

Features

- Ethernet Switch acc. to IEEE 802.3
- Ethernet (10 Mbit/s), Fast Ethernet (100 Mbit/s) and Gigabit Ethernet (1000 Mbit/s)
- 5 / 10 ports unmanaged
- Auto-crossing, Auto-negotiation, Auto-polarity
- Diagnostic LEDs (Link status, Data, Power, Error)
- Store and Forward Switching Mode, non-blocking

Advantages

- High degree of protection IP65 / IP67
- Robust metal housing
- Can be used directly in industrial environments
- EMC, temperature range and mechanical stability meet the toughest demands
- PROFINET compatible

Application fields

- Industrial automation
- Railway applications
- Automotive industry
- Wind power

Technical characteristics Ha-VIS eCon 7050-A1, eCon 7100-AA

Ethernet interface – RJ45

Number of ports	5x / 8x 10/100Base-T(X) 2x 10/100/1000-Base-T(X)
Cable types according to IEEE 802.3	Shielded Twisted Pair (STP) or Unshielded Twisted Pair (UTP), Category 5
Data rate	10 Mbit/s, 100 Mbit/s or 1000 Mbit/s (for Ha-VIS eCon 7100-AA only) (Han® 3 A RJ45)

Ethernet Switch Ha-VIS eCon 9000

19" Ethernet Switches, unmanaged, for installation in a 19" rack

General description

The Ethernet Switches of the product family Ha-VIS eCon 9000 are recommended for use in the widest range of industrial applications and support Ethernet (10 Mbit/s) and Fast Ethernet (100 Mbit/s). The product family enables the connection of up to 8 network devices over Twisted Pair cables.

The Ha-VIS eCon 9000 Ethernet Switch family, with its integrated LEDs on each port, supports fast and easy network diagnosis. The Ha-VIS eCon Ethernet Switch operates as an unmanaged Switch in Store and Forward Switching mode and supports Auto-crossing, Auto-negotiation and Auto-polarity.

Features

- Ethernet Switch acc. to IEEE 802.3
- Ethernet (10 Mbit/s) and Fast Ethernet (100 Mbit/s)
- Auto-crossing, Auto-negotiation, Auto-polarity
- Diagnostic LEDs (Link status, Data, Power)
- Store and Forward Switching Mode, non blocking
- Pluggable in 19" racks

For Ethernet Switch Ha-VIS eCon 9070-B only:

- Power input on the front – no backplane necessary

Advantages

- Robust metal housing
- EMC, temperature range and mechanical stability meet the toughest demands

Application fields

- Railway applications
- Industrial automation
- Automotive industry
- Wind power
- Power distribution systems

Technical characteristics

Ethernet interface – M12

Introduction

For the user, HARTING's novel and innovative solutions open up new, more convenient and extensive options for configuring Unmanaged Ethernet Switches. The solutions available to date offered only very limited or basic options for making alterations to different settings on an Ethernet Switch.

The user made changes to the settings or the configuration via the DIP switches on the Ethernet Switch. The extensive possibilities for applications were physically restricted by the enormous space requirements of the mechanical solution.

Now for the first time, HARTING's Ha-VIS sCon solution makes it possible for the user to realise more configurations than have been possible to date.

Ease of handling and simple operation have been designed in to meet real-life application requirements. Simple and fast configuration is what this solution aims to achieve.

All Ha-VIS sCon Ethernet Switches can be configured via a USB connection cable.

At first sight, Ha-VIS sCon Ethernet Switches do not differ from the Ethernet Switches available to date. However, the possibilities that Ha-VIS sCon has to offer become more than apparent to the user when he connects the Ethernet Switch via the front-side USB socket to a PC, laptop or hand-held PC.

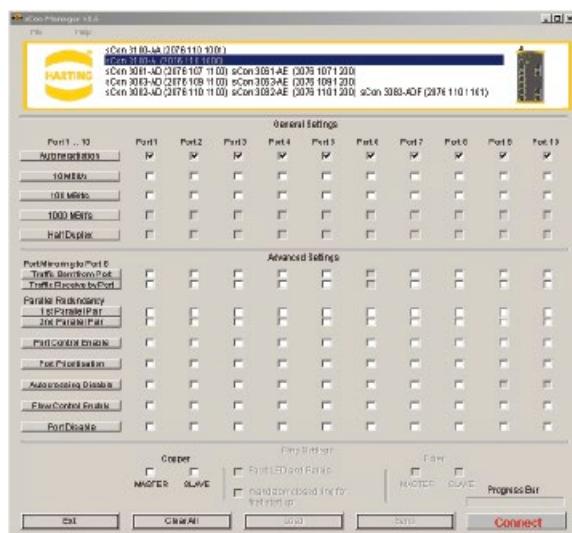

Figure 1 The Start-up menu

Once the Ha-VIS sCon Ethernet Switch has been connected to a PC, it can be accessed on-screen in much the same manner as a commercially available USB stick (Figure 1: The Start-up menu).

The user only has to copy the Ha-VIS sCon software in advance onto the PC. No administrator rights are required. The Ethernet Switch does not have to be connected to a power supply for configuration purposes. That means that the configuration procedure can take place at the user's location of choice: in the office, workshop or production facility. The Ha-VIS sCon Ethernet Switch automatically detects which power supply is connected: mains supply or power supply via the USB port. Please note that it is not possible to operate the Ethernet Switch purely via the USB port. For normal industrial operations, the power must be supplied via one of the redundant inputs.

Introduction

Making configuration settings by means of DIP switches may appear to be uncomplicated. However, accidentally making an alteration to the configuration can happen more quickly than one would think possible, and in so doing make considerable changes to the previously set procedures. The Ha-VIS sCon family prevents these inadvertent alterations to the configuration. No alteration can be made to the configuration without an USB connection and the software.

Each configuration can be archived on the PC and the back-ups retrieved for future projects. By making back-ups of the configuration, all settings can be conveniently stored in case servicing is necessary.

Archived configurations can be imported and printed out when convenient. These extensive options in Ha-VIS sCon ensure that data security enjoys the significance it deserves.

The switch configuration is transmitted only when a new configuration is uploaded via the corresponding 'Send' button. This means that until the data has actually been uploaded, it is still possible to read-in the 'old' data from the Ha-VIS sCon Ethernet Switch via the Refresh option. This means it is easily possible to reverse any inadvertent activation in the corresponding menu.

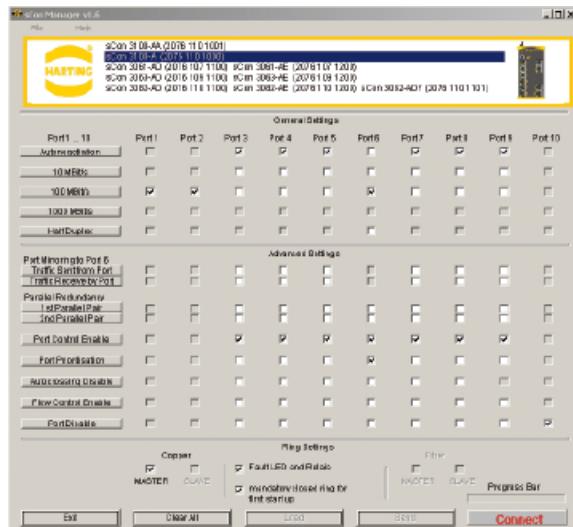

Figure 2 Example of a configuration

Once configured, the Ethernet Switch can be utilised immediately. The configuration remains stored in the Ethernet Switch after the USB cable is removed.

Meeting international standards, the USB port described is recognised as state-of-the-art technology. The standardised possibility for world-wide utilisation with all notebooks, PCs and Palmtops (revisions 1.0, 1.1 and 2.0) mean that this technology is suitable for universal usage.

The intuitive, but extensive options setting via the relevant buttons and the various options offered by Ha-VIS sCon extend the range of applications for unmanaged Ethernet Switches. With Ha-VIS sCon, the gap between unmanaged and manageable switches is getting smaller.

It is true that sCon is a solution for Unmanaged Ethernet Switches; however, it comes very close to Managed Ethernet Switch functionality.

Ethernet Switch

Ha-VIS sCon 3000

Ethernet Switches, unmanaged, for mounting onto top-hat mounting rail in control cabinets, including sCon functions

General description

The Fast Ethernet Switches of the product family Ha-VIS sCon 3000 can be configured via a USB port for special or more performance-oriented industrial usages. There are almost no limits to the different possibilities.

Activation of parallel and / or ring redundancy or port prioritisation will clearly increase the availability and reliability of data communications through the Ha-VIS sCon 3000.

Features

- Ethernet Switch acc. to IEEE 802.3
- Store and Forward Switching Mode, non blocking, unmanaged
- Auto-crossing, Auto-negotiation, Auto-polarity
- Diagnostic LEDs (Link status, Act, Power, Data transmission rate, Error)
- Following settings are available via USB port:
 - Parameterisation via USB port:
 - Alarm signalling contact (Link alignment, low voltage, ring error)
 - Auto-negotiation
 - Data transmission rate
 - Full/Half Duplex
 - Ring and/or parallel redundancy
 - ports enable / disable
 - Port priority
 - Port Mirroring
 - Pause Frame

Advantages

- Individually configurable via USB port
- Robust metal housing
- EMC, temperature range and mechanical stability meet the toughest demands
- Ring redundancy and/or parallel redundancy

Application fields

- Industrial automation
- Power distribution systems
- Automotive industry
- Mechanical engineering
- Railway applications

Technical characteristics

Ethernet interface – RJ45

Number of ports	6x / 8x / 10x 10/100Base-T(X) 2x 10/100/1000-Base-T(X)

Fast Track Switching Introduction

Fast Track Switching

Automation IT is a communication platform that serves all applications within an industrial manufacturing firm. By connecting all applications, the uniform platform network increases the efficiency of company workflows.

Automation IT supports Standard Ethernet at all levels – including the office, management and control levels, and also in the field.

Automation IT – the platform for all applications

The currently available switching technology used in IEEE 802.3 Ethernet, however, does not offer the level of determinism required for automation applications. That is why automation solutions that only implement standard (unchanged) Ethernet require a restricted network design in order to match automation performance levels. Thus there are limited options for the network topology or segmentation – to the extent that IT communications are not allowed within the automation environment.

Automation requires for Industrial Ethernet:

- top performance
- safety
- flexible topology
- and above all determinism

Standard Ethernet switching is based on store-and-forward switching and this introduces long latency times for the frames. But even more serious is the tight dependency on the degree of network traffic: if only automation frames are present in the network, then these frames can be transmitted with no problems. But additional data traffic on the network will compete with the automation frames for forwarding and can thus delay these frames.

Standard switching uses the QoS (Quality of Service) option to influence this. If multiple frames are located in the switch queue, then the frames with the highest priority are forwarded first. But it is still possible for other data frames with priorities equal to or greater than the automation frames to be present. And even when the automation frame has the highest priority, if a data frame is in the process of being sent, the next automation frame must wait until 1522 bytes have been completely sent. Only then is the path open for the automation frame. The same delay could then happen on the next network switch once more. So these wait delays can quickly add up to times which are critical for automation applications. This behaviour can be seen as stochastically random. Most of the time the transfer times will be sufficient. But it only takes one delayed frame to trigger a problem.

Fast Track Switching Introduction

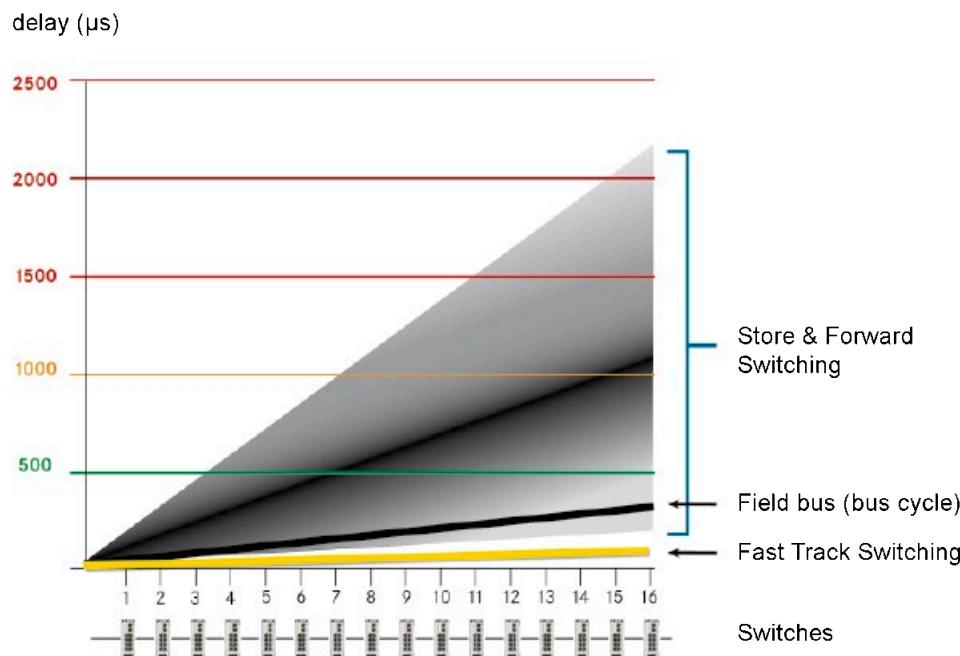

Several Ethernet-based methods have identified this problem and eliminated it. However such methods require each network node to implement specialized hardware for communication.

With the development of Fast Track Switching (FTS), HARTING has found a new path. FTS switches solve the performance and deterministic problems while all other nodes require only the standard Ethernet interfaces.

Fast Track Switching uses three key features to achieve this:

1. Preferred frames (such as automation frames) are detected first. The switch can focus on any specific part of the Ethernet header for special properties. For example, PROFINET frames are Ethertype 8892. This type is then monitored and evaluated if the application needs to accelerate their transmission.
2. These key frames get fast-track forwarding – a cut-through process instead of store-and-forwarding. As a result, the switch latency time is minimized.
3. If the switch port needed for the forwarding is busy at that moment sending a data frame, then the data frame is buffered and the forwarding is aborted so that the automation frame can be forwarded immediately. Only after the automation frame is sent is a second attempt made to send the data frame.

A simple example serves to illustrate the superior performance of this Fast Track Switching:

An automation frame must travel on a path through 16 switches. The transmission time for the Ethernet frames under standard switching rules is tightly dependent on the network load. Thus the transmission time for the frames can vary widely according to the network load: a few arrive quite quickly, the majority have an average time, and a few frames travel quite slowly.

As a reference point, a comparable cycle for one of the Field bus protocols used widely in automation applications is shown in black. This protocol has state-of-the-art levels of determinism and transfer speeds. Sometimes the data arrives just as fast at its destination when standard switching is used – but only sometimes.

Fast Track Switching, on the contrary, exhibits excellent results and is deterministic.

Fast Track Switching Introduction

Now it has finally become possible to setup a universal Automation IT communications platform that reaches into the field level. And finally automation protocols which rely on standard unchanged Ethernet (such as PROFINET RT or EtherNet/IP) can deliver the high performance needed for automation applications.

HARTING has also integrated this groundbreaking technology into production models available for the user:

The configurable Ha-VIS FTS 3100 model offers an easy-to-configure FTS solution for users. Many switch options can be customized to fit your application – even by those who are not trained network administrators.

And with the fully managed switches from the Ha-VIS FTS 3000 line, HARTING combines FTS technology with all of the well-known functions of modern managed industrial Ethernet Switches.

Ethernet Switch Ha-VIS FTS 3000s

Ethernet Switch, unmanaged, with Fast Track Switching Technology, configurable via USB

General description

The Fast Ethernet Switches of the product family Ha-VIS FTS 3000 can identify automation protocols (e.g. PROFINET, EtherNet/IP, Modbus TCP and customized profiles), accelerate their data transmission and prefer them. They are suitable for industrial applications.

The product family enables the connection of up to 10 network devices over shielded Twisted Pair. It supports Ethernet (10 Mbit/s) and Fast Ethernet (100 Mbit/s).

The Ethernet Switch works as an unmanaged switch and can work in Cut Through mode and in Store and Forward mode. It supports Auto-crossing, Auto-negotiation and Auto-polarity.

Features

- Ethernet Switch according to IEEE 802.3
- Auto-crossing, Auto-negotiation, Auto-polarity
- Diagnostic LEDs (Link Status, Act, Data transmission rate, Power, Error)
- Store and Forward Switching Mode, non blocking, unmanaged
- Identification, acceleration and preference for automation frames
- Deterministic data transfer for selected profiles

Advantages

- Individually configurable via USB port
- Robust metal housing
- EMC, temperature range and mechanical stability meet the toughest demands

Application fields

- Industrial automation
- Mechanical engineering
- Automotive industry

Technical characteristics

Ethernet interface – RJ45

Number of ports	10x 10/100Base-T(X)
Cable types according to IEEE 802.3	Shielded Twisted Pair (STP) or Unshielded Twisted Pair (UTP), Category 5
Data rate	10 Mbit/s or 100 Mbit/s (RJ45)
Maximum cable length	100 m (Twisted Pair, with cable Category 5 acc. to DIN EN 50 173-1)
Termination	RJ45 (Twisted Pair)
Diagnostics (LED)	<ul style="list-style-type: none"> • Status Link - Green • Data transfer (Act) - Green flashing • Data transfer rate (Speed) - 100 Mbit/s: Yellow 10 Mbit/s: Green
Topology	<ul style="list-style-type: none"> • Line • Star • mixed
Parameterisation via USB	<ul style="list-style-type: none"> • Auto-negotiation • 10/100 Mbit/s • Full/Half Duplex • Port enable/disable • Port mirroring • Flow Control • FTS Port enable/disable • Industrial Profile (PROFINET, EtherNet/IP, Modbus TCP, customized) • NRT Bandwidth Control

Power supply

Input voltage	24 V --- (9.6 V ... 60 V ---)
Termination	5-pole, pluggable screw contact, for redundant power supply
Diagnostics (LED)	Power supply - LED Green

Design features

Ethernet Switch

Ha-VIS FTS 3000

Ethernet Switches, with Fast Track Switching Technology, managed

General description

The Fast Ethernet Switches of the product family Ha-VIS FTS 3000 can identify automation profiles (e.g. PROFINET, EtherNet/IP, Modbus TCP and customized profiles), accelerate their data transmission and prefer them. They are suitable for industrial applications.

The product family enables the connection of up to 10 network devices over shielded Twisted Pair or F.O. interfaces, according to type. It supports Ethernet (10 Mbit/s) and Fast Ethernet (100 Mbit/s).

The Ethernet Switch works as a managed switch and can work in Fast Track Switching mode and in Store and Forward mode. It supports Auto-crossing, Auto-negotiation and Auto-polarity.

Features

- Managed Ethernet Switch according to IEEE 802.3
- Fast Track Switching Mode, Store and Forward Switching Mode
- Auto-crossing, Auto-negotiation, Auto-polarity
- Diagnostic LEDs (Link Status, Data, Power)
- Identification, acceleration and preference for automation frames
- Deterministic data transfer for selected profiles
- Robust metal housing, RoHS compliant
- PROFINET IO Device

Advantages

- Robust metal housing
- EMC, temperature range and mechanical stability meet the toughest demands

Application fields

- Industrial automation
- Automotive industry
- Mechanical engineering

Technical characteristics

Ethernet interface – RJ45

Number of ports	6x / 8x / 10x 10/100Base-TX
Cable types according to IEEE 802.3	Shielded Twisted Pair (STP) or Unshielded Twisted Pair (UTP), Category 5
Data rate	10 Mbit/s or 100 Mbit/s (RJ45)
Maximum cable length	100 m (Twisted Pair, with cable Category 5 acc. to DIN EN 50 173-1)
Termination	RJ45 (Twisted Pair)

Management Software Overview

Network Management

With the Ha-VIS mCon families, HARTING has expanded its range of Ethernet switches. The series offers a broad spectrum of possibilities: in addition to the standard functions already present in the sCon and eCon Series, the Ha-VIS mCon switches offers management functions which set up a convergent and manageable network.

With the introduction of the new management software V2.0 for the HARTING Ha-VIS mCon switch families, the strong competitive capability will achieve a new level. A lot of improvements and additional features have been added to the software and the future development is assured. This new management software has been designed for industrial use and provides professional network solutions.

The configuration and management of the Ha-VIS mCon switches is made simply: either via SNMP tools, network management software or very easily via a web interface.

Overview – Intuitive web management interface

The Ha-VIS mCon switches can be accessed and configured via a normal internet browser, without the need of any additional tools or browser plugins (Java etc.) The web management is password protected and provides a range of access levels. An easy and intuitive tree menu allows the Ha-VIS mCon switches to be customized and adapted to a specific network.

A huge variety of management functionalities and features are integrated in the HARTING Ha-VIS mCon switches, to provide the best possibilities for the customer.

Support of VLANs allow the Ha-VIS mCon switches to segment a network, which results in better control of the communication flow and the avoidance of unnecessary network loads. The IGMP functionality ensures, that multicast traffic like video/audio streams and automation packets are only forwarded through ports, which are involved in this application. With RSTP it is possible to build up redundant networks, to assure the availability of the network even in the case of failure or incorrect configuration. To improve and assure the security and integrity of the network, HARTING has integrated a lot of security functionalities, like the port based access control via 802.1x and Radius and the IP Authorized manager. All Ha-VIS mCon switches support a fast and easy network diagnosis and a wide scale of alerting mechanisms.

Ha-VIS mCon switches can be used in all applications, offer professional solutions for the operation of Ethernet networks and are simple to install and use. The Ha-VIS mCon families will always be used in high level applications to provide a fully managed and adaptable Ethernet network for automation solutions. The customer has the possibility to configure and develop all applications on the basis of his requirements.

Web-Interface via HTTP

- HTML based web interface
- No additional software needed
- Rapid access to the switch
- Intuitive configuration

SNMP (v1, v2, v3)

- Accessible via standard MIBs
- Professional configuration
- Using of professional management tools

Management Software Overview

Diagnostic and alert functions

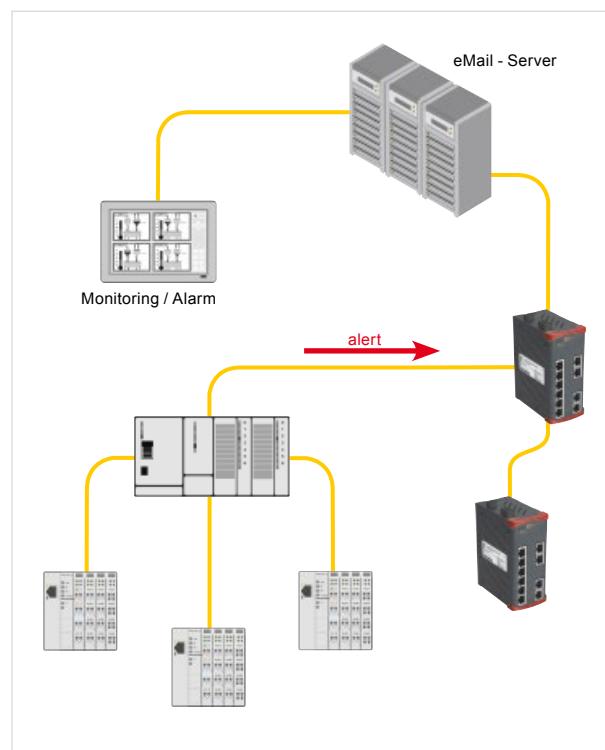

The reliability and operational availability of industrial Ethernet networks are highly associated with the possibility of management and diagnosis functionalities. For most applications it is mandatory to have an overview of what is happening in the network anytime. To assure a trouble free data flow, it is necessary that all failures in the network are propagated to a maintenance station.

The Port Mirroring feature allows the capturing of the incoming and outgoing data traffic of the switch. By connecting a network analyzer to a configured mirror-to port, the network traffic going through the entire switch can be easily monitored, without changing the network topology.

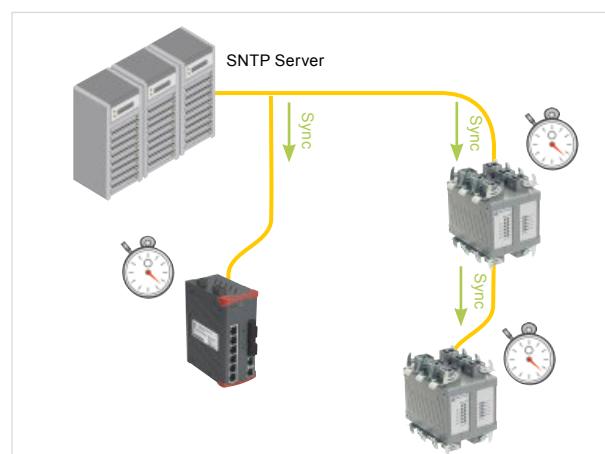

Certain network or Ethernet switch events may require the attention of service personnel. It is possible to select several events according to the requirements, which will cause a notification to a remote monitoring station if they occur. This notification can be done by sending an eMail or a SNMP trap.

In addition to notification per e-mail and SNMP trap, the alarm signal can be relayed via a connected relay to an external signaling device (depending on the type).

Examples for an event within the system are alterations to the configuration, a port event, interruption or creation of a link between a port and a connected device. Additional features like a locally saved switch history and a MAC address table are also helpful utilities to keep track of the network. All events are time synchronized with support of the SNTP protocol.

eMail and SNMP alert mechanism

Time synchronization with SNTP

Management Software Overview

Network Discovery via Link Layer Discovery Protocol (LLDP)

The Link Layer Discovery Protocol allow systems on an Ethernet LAN to advertise their key capabilities to neighbor nodes and also to learn about the key capabilities of other systems on the same Ethernet LAN.

This, in turn, promotes a unified network management view of the LAN topology and connectivity to aid network administration and trouble-shooting.

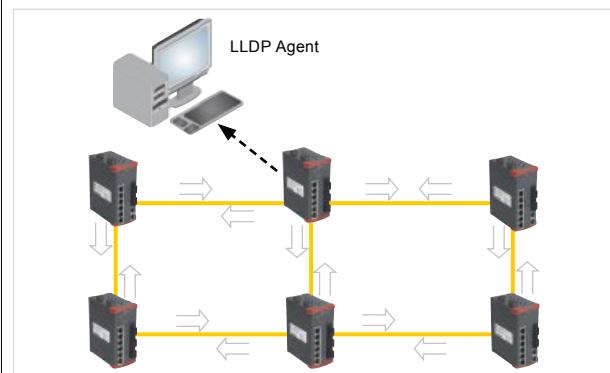

In general a network administration station can be connected to one single switch and from there it is able to access the connectivity information in the complete network within the application.

Port-Based Access Control with 802.1x

With the affiliation of the common office communication with the industrial networks, security and flexibility become more and more important for industrial Ethernet networks and applications. The demand of security and reliability is increasing rapidly. Therefore, industrial Ethernet networks need an end device authentication method that is highly secure but not tied to a ports physical location. For this reason, the HARTING Ha-VIS mCon Switches supports the 802.1x authentication functionality conform to the IEEE standard 802.1X REV 2004. This authentication method prevents access to a switch port in cases, if the authentication and authorization fails. The HARTING management software supports dynamic enabling or disabling of the Network Access Control feature in the switch through management configuration. The authorization of an attached supplicant can be proceed on two different ways: either remote or local.

IP authorized manager

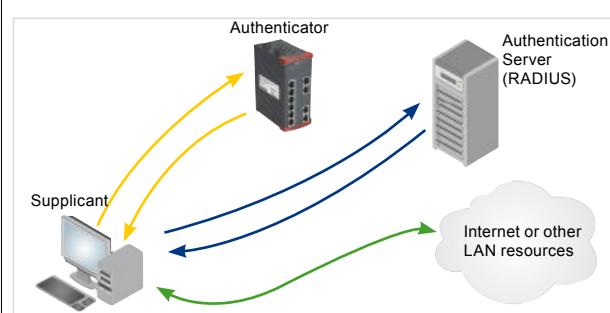

The IP authorized manager feature enables the switch to enhance security on the network by using IP addresses to authorize which stations (PCs or workstations) can access the switch. Thus, having the correct passwords (when logging through TELNET/WEB) is not sufficient for accessing the switch through the network, unless the station attempting access is also included in the switch's Authorized IP Managers configuration.

LLDP – Neighbor information exchange

With the local authorization, the data which is needed is stored directly on the switch, so no external instance is needed. The other way is the remote authorization via a RADIUS server and the EAPoL protocol. The database, containing all information of the network devices which are allowed to get access to the network are stored at the server side and can be managed from a single point. 802.1x user authentication is rapidly becoming an expected component of any Ethernet infrastructure.

- Prevention of unauthorized network access based on access data, not the physical address
- User authentication in the complete network without bindings to a special port
- Attaching and move devices

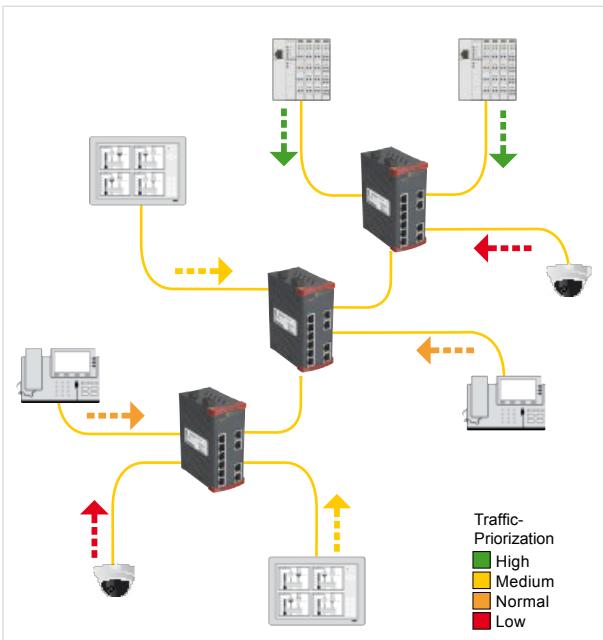

802.1X based user authentication procedure

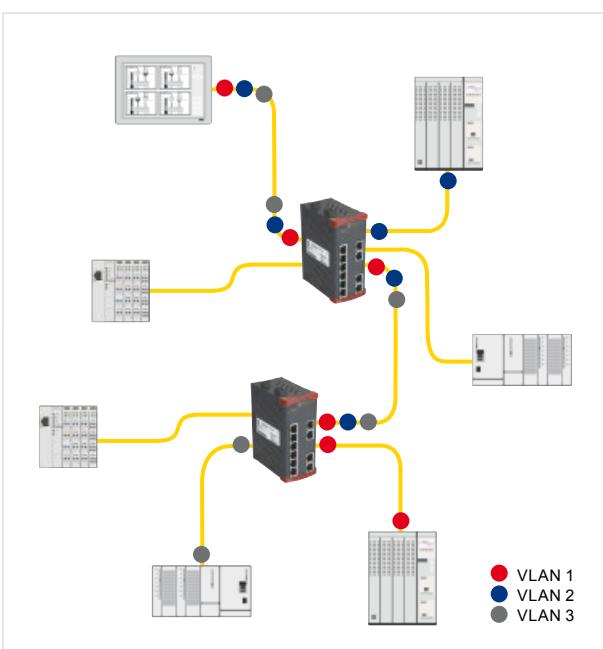

Management Software Overview

Quality of Service (802.1p, DiffServ)

Quality of Service (QoS) is a technology for managing network traffic in a cost effective manner to enhance network performance and reliability of the application. QoS allows the prioritization of the network traffic to assure quality and performance at any time. For example, QoS technologies can be applied to prioritize traffic for latency-sensitive applications (such as automation protocols and voice or video) and to control the impact of latency-insensitive traffic. The IEEE 802.1p standard provides up to eight traffic classes which can be configured via the management software. The queuing scheme and the way the traffic will be handled inside the switch can adapted to the requirements of the application.

Traffic prioritization for time critical applications

Traffic management with VLANs

Management Software Overview

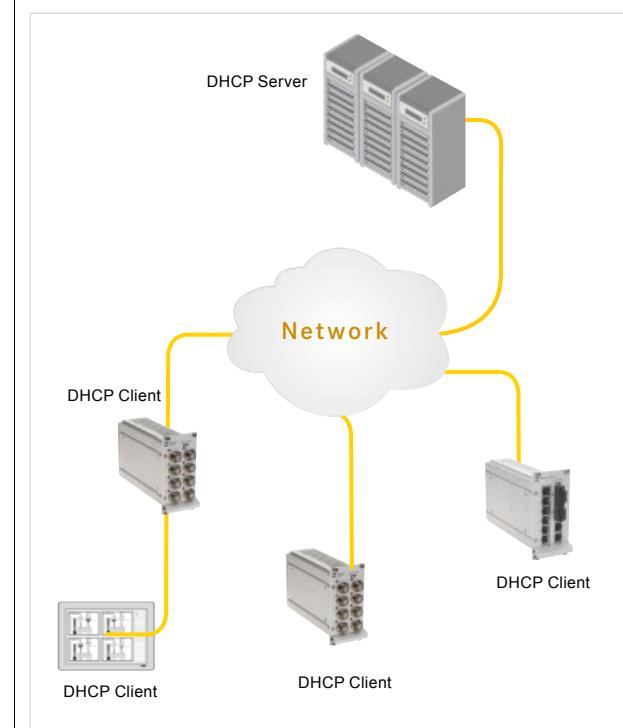

DHCP Option 82

Upgrading and changing the structure of Ethernet networks causes usually a lot of administrative effort. Configuration of security and addressing procedures has to be redone every time a device will be changed. Replacing or moving of network devices causes a lot of trouble, because some network mechanisms such as dynamic IP address assignment are MAC based. The Industrial market searches for a method to simplify the addition and replacement of Ethernet devices to reduce the maintenance effort. DHCP Option 82 provides a mechanism for generating IP addresses based on the location where the client device is attached in the network. By using DHCP option 82, the Ha-VIS mCon switches are able to include additional information about itself, when forwarding DHCP packets. Information about its location can be sent along with the request to the server.

The DHCP server makes a decision on what IP should be assigned to the end device based on this location information.

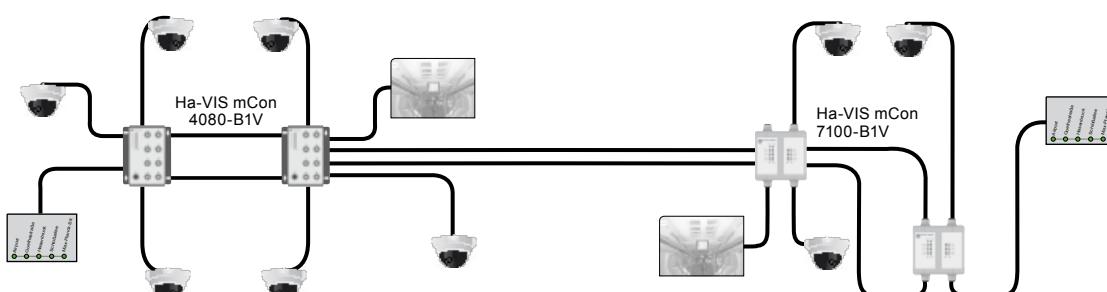

IGMP Snooping

A Layer 2 switch by default, floods multicast traffic within the broadcast domain. This can consume a lot of bandwidth if many multicast servers are sending streams of data. IGMP Snooping are meant to dynamically discover the presence of multicast receivers and use the learnt information to control the multicast traffic flow, restricting it only to the desired ports on which receivers are present. HARTING provides support for dynamic multicast registration support through IGMP snooping (for IPv4 multicast traffic). IGMP snooping can be used for Layer 2/3 traffic and provides a much greater degree of granularity in selecting multicast traffic.

Location-dependent IP address assignment

IGMP learns the multicast forwarding information through the IGMP report messages from hosts and updates the forwarding database. It is possible to edit and add information to the forwarding database manually, so there is no limitation and restriction for the network topology and the application. The IGMP forwarding database based on multicast group MAC address (MAC based). All Ha-VIS mCon switches support IGMP version 1,2 and 3 and also the Querier functionality.

Multicast application with multiple sources and receivers

Management Software Overview

Rapid Spanning Tree

A continuous and failure tolerant network is an essential claim for industrial applications and their network components. The high availability is a mandatory demand to guarantee the failure free operation of these networks. Network redundancy is the ability to handle and endure a link failure without a permanent communication break down. Network redundancy is important in applications, where a single failure can result in significant consequences which can not be tolerated. The Ha-VIS Management Software supports the Rapid Spanning Tree protocol to form loop free topology in a network. RSTP detects topology changes and reconfigures the topology and intimates the topology change to all the switches in the LAN. RSTP avoids this delay by calculating an alternate root port, and immediately switching over to this port if the root port becomes unavailable. Thus, using RSTP, the switch immediately brings the alternate port to forwarding state, without any delay.

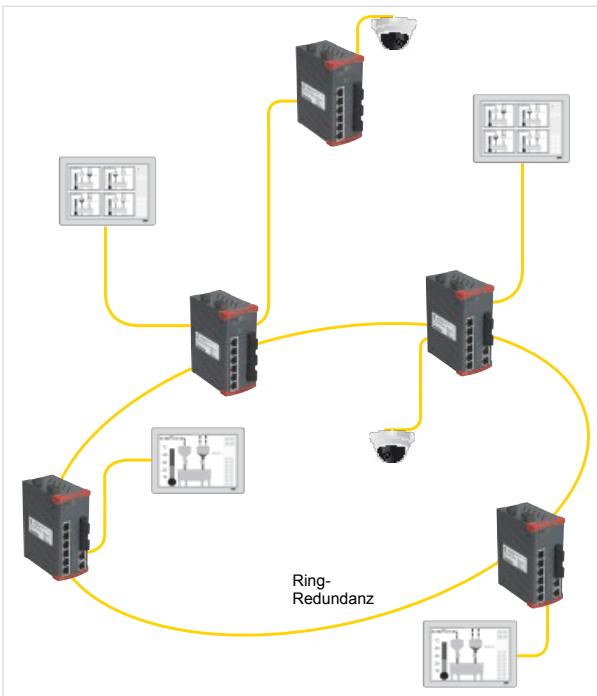

- High availability via redundancy
- Loop free and failure tolerant network
- Fast convergent and recovery time

Link Aggregation (LA)

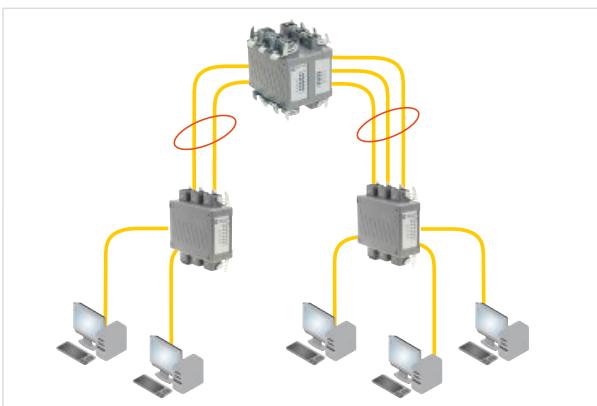

Link Aggregation or trunking is a feature, which allows the combining of several physical network links into a single logical link. This combination brings a lot of advantages to the existing network topology. With Link Aggregation it is clearly possible to increase the bandwidth between switches to handle heavy network loads at specific points. Furthermore LA offers the possibility to use load balancing on these links. One of the most important benefits is the increased availability between network devices. Because of the physical redundant link with more than one cable, the connection is still available in case of a link failure. Aggregation groups are formed dynamically using LACP or statically using manual aggregation.

Link Aggregation bietet die folgenden Vorteile:

- Increased bandwidth
- Link redundancy
- High availability
- Load sharing on the individual links
- Aggregating replaces Upgrading

High availability with RSTP

Link Aggregation – Load Balancing, Redundancy, increased bandwidth

Management Functions

Basic Functions		
	Store and Forward Switching Mode	IEEE 802.3
	Manual and Dynamic IP Address Assignment	
Port-Settings	Auto-negotiation on / off	
	Port Speed 10 Mbit/s / 100 Mbit/s	
	Half / Full duplex	
	Port disable / enable	
	Link Up/Down Trap disable / enable	
	Flow Control disable / enable	
	Network Discovery	Link Layer Discovery Protocol (LLDP)

Ethernet Switch

Ha-VIS mCon 3000 Next Generation

Ethernet Switches, managed, for mounting onto top-hat mounting rail in control cabinets

General Description

The fully Managed Ethernet Switches of the product family Ha-VIS mCon 3000 enable the connection of up to 10 network devices (according to type) over RJ45 ports or SFP modules on lowest area.

Degree of protection, mechanical stability and the comprehensive management software provide for high operation safety and meet highest demands.

The Ha-VIS mCon 3000 Ethernet Switches are designed for an effective, industrial and individual use.

The configuration via SD card or via the Multifunction button enables an easy and fast commissioning in the field.

Comprehensive possibilities of configuration and diagnostic are provided easy via web interface or standardized via SNMP.

The Ethernet Switches of the Ha-VIS mCon 3000 Next Generation family can be used as PROFINET IO devices.

Features

- Full managed Ethernet Switch acc. to IEEE 802.3
- Up to 10 ports, managed, non-blocking
- Store and Forward Switching Mode
- Gigabit Uplink ports, RJ45 and SFP modules
- Auto-crossing, Auto-negotiation, Auto-polarity
- Temperature range -40 °C ... +70 °C
- PROFINET IO device
- Time synchronization via IEEE 1588v2
- Multifunction button for fast commissioning
- SD card slot for storage of the configuration
- Management functions see pages 01.141 and 01.142

Advantages

- Small, robust metal housing
- External SD card for storage of the configuration
- Individual pre-configuration via Multifunction button
- Fast removable Ethernet data links via SFP "Hot-Swap"
- Optimized DIN rail fitting
- EMC, temperature range and mechanical stability meet the highest demands
- Universally applicable: PROFINET, Ethernet/IP or profile neutral

Application fields

- Mechanical engineering
- Robotics
- Industrial automation
- Industrial Network Infrastructure
- Wind power, Solar power
- Maritime

Technical characteristics

Ethernet interface RJ45

Number of ports

Ha-VIS mCon 3080-A	8x 10/100Base-T(X)
Ha-VIS mCon 3102-AASFP	8x 10/100Base-T(X) 2x 10/100/1000Base-T(X) (Combo ports with SFP slot)
Cable types acc. to IEEE 802.3	Shielded Twisted Pair (STP) or Unshielded Twisted Pair (UTP), Category 5

Data rate

10 Mbit/s, 100 Mbit/s or 1000 Mbit/s (RJ45)

Maximum cable length

100 m (Twisted Pair; with Category 5 cable acc. to DIN EN 50 173-1)

Termination

RJ45 (Twisted Pair)

Diagnostics (via LED)

- Status Link – Green
- Data transfer (Act) – Green flashing
- Data transfer rate (Speed) – 1000 Mbit/s: Green
100 Mbit/s: Yellow
10 Mbit/s: OFF

Topology

Ring, Line, Star or mixed

Ethernet Interface SFP (mini-GBIC) Fibre Optic and copper

Number of ports

Ha-VIS mCon 3102-AASFP	2x 100/1000Base (Combo ports with SFP slot)
------------------------	---------------------------------------------

Data rate

100 Mbit/s, 1000 Mbit/s

Termination

SFP modules according to MSA (Multi Source Agreement)

Diagnostics (via LED)

- Status Link – Green
- Data transfer (Act) – Green flashing

Power supply

Nominal input voltage

24 V ==

Termination

5-pole screw terminal, pluggable
for redundant power supply

Switch

Diagnostics (via LED)

- Device operates without failures – Green
- Power supply in the admissible range – Green
- Low voltage – Red
- Diagnostics failure – Red
- PROFINET failure / diagnosis – Red/Green flashing

Configuration

Slot for SD cards (back side)

- Saving and loading of configuration files
- Licence management for MRP

Multifunction button

Individual pre-configuration of software functions

Ethernet Switch Ha-VIS mCon 3000

Ethernet Switches, managed,
for mounting onto top-hat mounting rail in control cabinets

General description

The fully managed Ethernet Switches of the product family Ha-VIS mCon 3000 enable the connection of up to 10 network devices (according to type) over Twisted Pair cables and fibre-optic cables (Multi- and Singlemode). The Ha-VIS mCon 3000 Ethernet Switch family, with its integrated LEDs on each port, supports fast and easy network diagnosis.

The Ha-VIS mCon 3000 Ethernet Switches are designed for an effective, industrial and individual use. They support both SNMP and an easy Web interface for management functions.

Features

- Ethernet Switch acc. to IEEE 802.3
- Store and Forward Switching Mode
- Up to 10 ports, managed, non-blocking
- Auto-crossing, Auto-negotiation, Auto-polarity
- Temperature range -40 °C ... +70 °C

Advantages

- Robust metal housing
- EMC, temperature range and mechanical stability meet the toughest demands
- Integrated management functions

Application fields

- Industrial automation
- Automotive industry
- Wind power
- Power distribution systems

Technical characteristics

Ethernet interface – RJ45

Number of ports	6x / 8x / 10x 10/100Base-T(X) 2x 10/100/1000-Base-T(X)
Cable types according to IEEE 802.3	Shielded Twisted Pair (STP) or Unshielded Twisted Pair (UTP), Category 5
Data rate	10 Mbit/s, 100 Mbit/s or 1000 Mbit/s (RJ45)
Maximum cable length	100 m (Twisted Pair, with cable Category 5 acc. to DIN EN 50 173-1)
Termination	RJ45 (Twisted Pair)
Diagnostics (LED)	<ul style="list-style-type: none"> • Status Link - Green • Data transfer (Act) - Green flashing • Data transfer rate (Speed) - <ul style="list-style-type: none"> 1000 Mbit/s: Green 100 Mbit/s: Yellow 10 Mbit/s: OFF
Topology	<ul style="list-style-type: none"> • Line • Ring • Star • mixed

Power supply

Input voltage	24 V DC (9.6 V ... 60 V DC)
Termination	5-pole, pluggable screw contact, for redundant power supply
Diagnostics (LED)	Power supply - LED Green

Alarm signalling contact

Alarm signalling contact	Change-over contact, potential-free, 24 V DC / 0.5 A
Termination	3-pole pluggable screw contact
Diagnostics (LED)	Error - Red

Design features

Housing material	metal
Dimensions (W x H x D)	60 x 132 x 104 mm (without connectors)
Degree of protection acc. to DIN EN 60 529 for Ha-VIS mCon xxxx-AEx only	IP30 IP20
Assembly	<ul style="list-style-type: none"> • 35 mm top-hat rail acc. to EN 60 715 • Wall mounting, vertical assembly
Weight	approx. 0.6 kg

10-port Ethernet Switch for mounting onto top-hat mounting rail in control cabinets, including 2 Gigabit ports, with extended temperature range

Managed	IP30	PROFINET compatible	X	EtherNet/IP compatible	X
Number of ports, Copper / Termination		8x 10/100Base-T(X) / RJ45 (Twisted Pair) 2x 10/100/1000-Base-T(X) / RJ45 (Twisted Pair)			
Input voltage / Termination		24 V DC / 5-pole, pluggable screw contact, for redundant power supply			
Permissible range (min./max.)		9.6 V ... 60 V DC			
Input current		approx. 260 mA (at 24 V DC)			
Alarm signalling contact		Change-over contact, potential-free, 24 V DC / 0.5 A 3-pole pluggable screw contact			
Housing material		metal, powder-coated			
Dimensions (W x H x D)		60 x 132 x 104 mm (including cap, without connectors)			
Weight		approx. 0.6 kg			
Working temperature		-40 °C ... +70 °C			
Approvals		UL 60 950-1; DNV			
MTBF		720.000 h			
Management		fully managed via Web interface and SNMP Functions see pages 01.141 and 01.142			

Identification	Part number	Drawing	Dimensions in mm
Ha-VIS mCon 3100-AAV Ethernet Switch with 10 RJ45 ports including set for assembly on standard rail	20 76 110 4003		

Ethernet Switch

Ha-VIS mCon 3063-ADV

9-port Ethernet Switch for mounting onto top-hat mounting rail in control cabinets, including 3 F.O. ports (SC, MM)

Managed	IP30	PROFINET compatible	X	EtherNet/IP compatible	X
Number of ports, Copper / Termination		6x 10/100Base-T(X) / RJ45 (Twisted Pair)			
Number of ports, F.O. / Termination		3x 100Base-FX / SC-D female			
Input voltage / Termination		24 V DC / 5-pole, pluggable screw contact, for redundant power supply			
Permissible range (min./max.)		9.6 V ... 60 V DC			
Input current		approx. 320 mA (at 24 V DC)			
Alarm signalling contact		Change-over contact, potential-free, 24 V DC / 0.5 A 3-pole pluggable screw contact			
Housing material		metal, powder-coated			
Dimensions (W x H x D)		60 x 132 x 104 mm (including cap, without connectors)			
Weight		approx. 0.6 kg			
Working temperature		-40 °C ... +70 °C			
Approvals		UL 508; UL 60 950-1			
MTBF		710.000 h			
Management		fully managed via Web interface and SNMP Functions see pages 01.141 and 01.142

Ethernet Switch

Ha-VIS mCon 4000

Ethernet Switches, managed, for flat wall mounting

General description

The Fast Ethernet Switches of the product family Ha-VIS mCon 4000 are recommended for use in the widest range of industrial applications and support Ethernet (10 Mbit/s) and Fast Ethernet (100 Mbit/s). The product family enables the connection of up to 8 network devices over Twisted Pair cables.

Mechanical stability and temperature range meet the highest demands. The robust M12 interface shows its advantages especially in applications at risk of vibrations.

The Ethernet Switches support both SNMP and an easy Web interface for management functions.

Features

- Ethernet Switch according to IEEE 802.3
- Ethernet (10 Mbit/s) and Fast Ethernet (100 Mbit/s)
- Auto-crossing, Auto-negotiation, Auto-polarity
- Diagnostic LEDs (Link status, Data, Power)
- Store and Forward Switching Mode, non blocking
- Mounting onto wall, optionally onto top-hat mounting rail

For Ethernet Switch Ha-VIS eCon 4080-BPoE1 only:

- PoE support

Advantages

- Robust metal housing and flat housing style
- EMC, temperature range and mechanical stability meet the toughest demands
- Wide range for power supply input
- Additional type test according to EN 50 155 and EN 50 121-3-2

Application fields

- Railway applications
- Industrial automation
- Automotive industry
- Wind power

Technical characteristics

Ethernet interface – M12

Number of ports	8x 10/100Base-T(X)
Cable types according to IEEE 802.3	Shielded Twisted Pair (STP) or Unshielded Twisted Pair (UTP), Category 5
Data rate	10 Mbit/s or 100 Mbit/s (M12 D-coding)
Maximum cable length	100 m (Twisted Pair, with cable Category 5 acc. to DIN EN 50 173-1)
Termination	M12 D-coding (female)
Diagnostics (LED)	<ul style="list-style-type: none"> • Status Link - Green • Data transfer (Act) - Green flashing • Data transfer rate (Speed) - 100 Mbit/s: Yellow 10 Mbit/s: Green • Error - Red • Line • Ring • Star • mixed
Topology	

Power supply

Input voltage	24 / 48 V DC (12 V ... 60 V DC) - redundant
for Ha-VIS mCon 4080-B3V only	72 / 110 V DC (50.4 V ... 137.5 V DC) - redundant
Termination	M12 A-coding, male, for redundant power supply
Diagnostics (LED)	Power supply - LED Green

Design features

Housing material	metal
Dimensions (W x H x D)	130 x 166 x 50 mm (without connectors)
Degree of protection acc. to DIN EN 60 529	IP40
Assembly	Wall mounting, flat assembly
Weight	approx. 0.85 kg

Environmental conditions

Stock temperature	-40 °C ... +85 °C
Relative humidity	10 % ... +95 % (non-condensing)

Technical characteristics Ha-VIS mCon 4080-BPoE1V

Ethernet Switch
Ha-VIS mCon 7000
 Ethernet Switches, managed, for harsh industrial environments

General description

If additional services for networks in harsh industrial environments (filtering, prioritisation, topology), or individual network configurations are required, then the Ethernet Switches of the product family Ha-VIS mCon 7000 come into play.

These managed switches allow the connection of up to 10 end-units, according to switch type, over IEC 802.3 Twisted-Pair cabling. Protection class, temperature range and mechanical stability satisfy the highest requirements. These Ethernet Switches can therefore be directly used in industrial environments.

They support both SNMP and an easy Web interface for management functions.

Features

- Ethernet Switch acc. to IEEE 802.3
- Store and Forward Switching Mode
- 5 or 10 ports, managed, non-blocking
- Auto-crossing, Auto-negotiation, Auto-polarity
- Ethernet (10 Mbit/s), Fast Ethernet (100 Mbit/s) and Gigabit Ethernet (1000 Mbit/s)
- Diagnostic LEDs (Link status, Data, Power, Error)

Advantages

- High degree of protection IP65 / IP67
- Robust metal housing, zinc die-cast
- Can be used directly in industrial environments
- EMC, temperature range and mechanical stability meet the toughest demands
- Integrated management functions

Application fields

- Industrial automation
- Railway applications
- Automotive industry
- Wind power

Technical characteristics

Ethernet interface – RJ45

Number of ports	8x 10/100Base-T(X) 2x 10/100/1000-Base-T(X)
Cable types according to IEEE 802.3	Shielded Twisted Pair (STP) or Unshielded Twisted Pair (UTP), Category 5
Data rate	10 Mbit/s, 100 Mbit/s or 1000 Mbit/s (for Ha-VIS mCon 7100-AAV only) (Han® 3 A RJ45)
Maximum cable length	100 m (Twisted Pair, with cable Category 5 acc. to DIN EN 50 173-1)
Termination	Han® 3 A RJ45 (female)
Diagnostics (LED)	<ul style="list-style-type: none"> • Status Link (Link/Act) - terminal device is connected: Green data transmission in process: Green flashing • Data transfer rate (Speed) - 1000 Mbit/s: Green 100 Mbit/s: Yellow 10 Mbit/s: OFF
Topology	<ul style="list-style-type: none"> • Line • Ring • Star • mixed

Power supply

Input voltage	24 / 48 V DC (12 V ... 60 V DC) - redundant
Termination	Han® 4 A, male, for redundant power supply (including fixing screw 09 20 000 9918 to maintain IP67)
Diagnostics (LED)	Power supply - LED Green

Alarm signalling contact

Alarm signalling contact	Change-over contact, potential-free, 24 V DC / 0.5 A
Termination, device-side	Han® 3 A, male
Diagnostics (LED)	Error - Red

Design features

Housing material	zinc die-cast
Dimensions (W x H x D)	90 x 120 x 87 mm (without connectors)
Degree of protection acc. to DIN EN 60 529	IP65 / IP67
Assembly	<ul style="list-style-type: none">• 35 mm top-hat rail acc. to EN 60 715• Wall mounting, vertical assembly
Weight	approx. 1.4 kg

Environmental conditions

Working temperature	-40 °C ... +70 °C
Stock temperature	-40 °C ... +85 °C
Relative humidity	10 % ... +95 % (non-condensing)

Technical characteristics Ha-VIS mCon 7050-B1V, mCon 7100-B1V

Ethernet interface – M12

Number of ports	5x / 10x 10/100Base-T(X)
Cable types according to IEEE 802.3	Shielded Twisted Pair (STP) or Unshielded Twisted Pair (UTP), Category 5
Data rate	10 Mbit/s or 100 Mbit/s (M12 D-coding)
Maximum cable length	100 m (Twisted Pair, with cable Category 5 acc. to DIN EN 50 173-1)
Termination, device-side	M12 D-coding (female)

Ethernet Switch

Ha-VIS mCon 9000

Ethernet Switches, managed, for installation in a 19" rack

General description

The Ethernet Switches of the product family Ha-VIS mCon 9000 are recommended for use in the widest range of industrial applications and support Ethernet (10 Mbit/s) and Fast Ethernet (100 Mbit/s). The product family enables the connection of up to 8 network devices over Twisted Pair cables.

The Ha-VIS mCon 9000 Ethernet Switch family, with its integrated LEDs on each port, supports fast and easy network diagnosis. The Ha-VIS mCon Ethernet Switch operates in Store and Forward Switching mode and supports Auto-crossing, Auto-negotiation and Auto-polarity.

Features

- Ethernet Switch acc. to IEEE 802.3
- Ethernet (10 Mbit/s) and Fast Ethernet (100 Mbit/s)
- Auto-crossing, Auto-negotiation, Auto-polarity
- Diagnostic LEDs (Link status, Data, Power)
- Store and Forward Switching Mode, non-blocking
- Pluggable in 19" racks
- Power input on the front, no backplane necessary

Advantages

- Robust metal housing
- Integrated management functions
- EMC, temperature range and mechanical stability meet the toughest demands

Application fields

- Railway applications
- Industrial automation
- Automotive industry
- Wind power
- Power distribution systems

Technical characteristics

Ethernet interface – M12

Number of ports	7x / 8x 10/100Base-T(X)
Cable types according to IEEE 802.3	Shielded Twisted Pair (STP) or Unshielded Twisted Pair (UTP), Category 5
Data rate	10 Mbit/s or 100 Mbit/s (M12 D-coding)
Maximum cable length	100 m (Twisted Pair, with cable Category 5 acc. to DIN EN 50 173-1)
Termination	M12 D-coding (female)
Diagnostics (LED)	<ul style="list-style-type: none"> • Status Link - Green • Data transfer (Act) - Green flashing • Data transfer rate (Speed) - 100 Mbit/s: Yellow 10 Mbit/s: OFF
Topology	<ul style="list-style-type: none"> • Line • Ring • Star • mixed

Power supply

Input voltage	24 / 48 V DC (8 V ... 60 V DC) - redundant
Termination	<ul style="list-style-type: none"> • M12 A-coding, male or • DIN frame connector, type F
Diagnostics (LED)	Power supply - LED Green

Alarm signalling contact (for Ha-VIS mCon 9080-B1V only)

Alarm signalling contact	Change-over contact, potential-free, 24 V DC / 0.5 A
Termination, device-side	DIN frame connector, Type F
Diagnostics (LED)	Error - Red

Design features

Housing material	aluminium
Degree of protection acc. to DIN EN 60 529	IP20 (front side IP40, when mounted)
Assembly	19" rack, 3 U

Weight approx. 0.6 kg

Environmental conditions

Stock temperature	-40 °C ... +85 °C
Relative humidity	10 % ... +95 % (non-condensing)

Ethernet Switch
Ha-VIS mCon 9070-BV
 7-port Ethernet Switch for installation in a 19" rack

Managed	IP20	PROFINET compatible	X	EtherNet/IP compatible	X
Number of ports, Copper / Termination		7x 10/100Base-T(X) / M12 D-coding (female)			
Input voltage / Termination		24 / 48 V DC / M12 A-coding, male			
Permissible range (min./max.)		8 V ... 60 V DC			
Input current		approx. 130 mA (at 24 V DC)			
Housing material		aluminium, anodised			
Dimensions (W x H x D)		60.6 mm (3 U) x 128.4 mm (12 HP) x 167.5 mm			
Weight		approx. 0.6 kg			
Working temperature		-40 °C ... +70 °C			
MTBF		667.000 h			
Management		fully managed via Web interface and SNMP Functions see pages 01.141 and 01.142			

Identification	Part number	Drawing	Dimensions in mm

Ethernet Switch

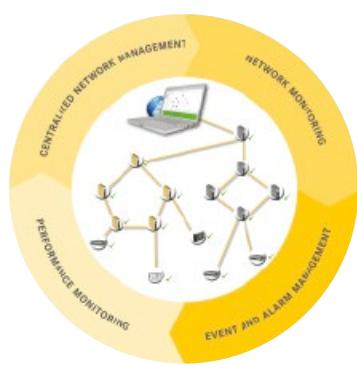

Ha-VIS mCon 9080-B1V

8-port Ethernet Switch for installation in a 19" rack

Managed	IP20	PROFINET compatible	X	EtherNet/IP compatible	X
Number of ports, Copper / Termination		8x 10/100Base-T(X) / M12 D-coding (female)			
Input voltage / Termination		24 / 48 V DC / DIN frame connector, Type F			
Permissible range (min./max.)		8 V ... 60 V DC			
Input current		approx. 130 mA (at 24 V DC)			
Alarm signalling contact		Change-over contact, potential-free, 24 V DC / 0.5 A DIN frame connector, Type F			
Housing material		aluminium, anodised			
Dimensions (W x H x D)		60.6 mm (3 U) x 128.4 mm (12 HP) x 173.5 mm			
Weight		approx. 0.6 kg			
Working temperature		-40 °C ... +70 °C			
MTBF		631.000 h			
Management		fully managed via Web interface and SNMP Functions see pages 01.141 and 01.142			

Identification	Part number	Drawing	Dimensions in mm
Ha-VIS mCon 9080-B1V Ethernet Switch with 8 ports M12 D-coding	20 76 208 7002		

General Description

The Ha-VIS Dashboard acts as central operating and management software for Ethernet networks. The software is developed especially for monitoring, setting up, and maintaining complex and powerful IP-based communication networks.

The Ha-VIS Dashboard detects managed network devices and is capable of representing the network topology automatically. All intelligent HARTING network devices can be centrally monitored and administrated.

A list of individual devices and a topology overview are displayed. A search function is also available for these devices.

The software displays ring topologies recognized by HARTING switches using the Rapid Spanning Tree Protocol.

HARTING's Ha-VIS Dashboard displays connectivity interruptions within the topology and lists them in an event log. Events (including SNMP traps) can be configured to trigger further actions such as sending e-mails or executing programs.

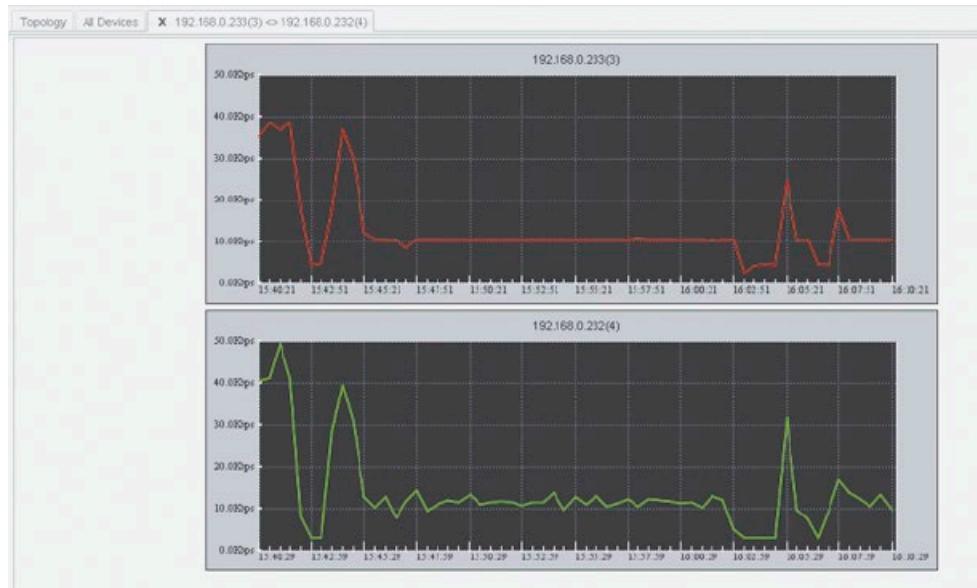

To improve clarity, events which have already been processed can be manually confirmed by the user. Custom filters can be created to filter out certain types of event messages

ID	Ack	Type	Category	Receive Time	Source	Component
100	<input type="checkbox"/>	Status Better	2012-05-03 15:23:38	192.168.0.231	Protocol/Protocol_Ping_Status	OK/Reachability=Yes

103	<input type="checkbox"/>	Status Better	2012-05-03 15:23:38	192.168.0.231	Protocol/Protocol_Ping_Status	OK/Reachability=Yes
104	<input type="checkbox"/>	Status Better	2012-05-03 15:23:38	192.168.0.230	Protocol/Protocol_Ping_Status	OK/Reachability=Yes

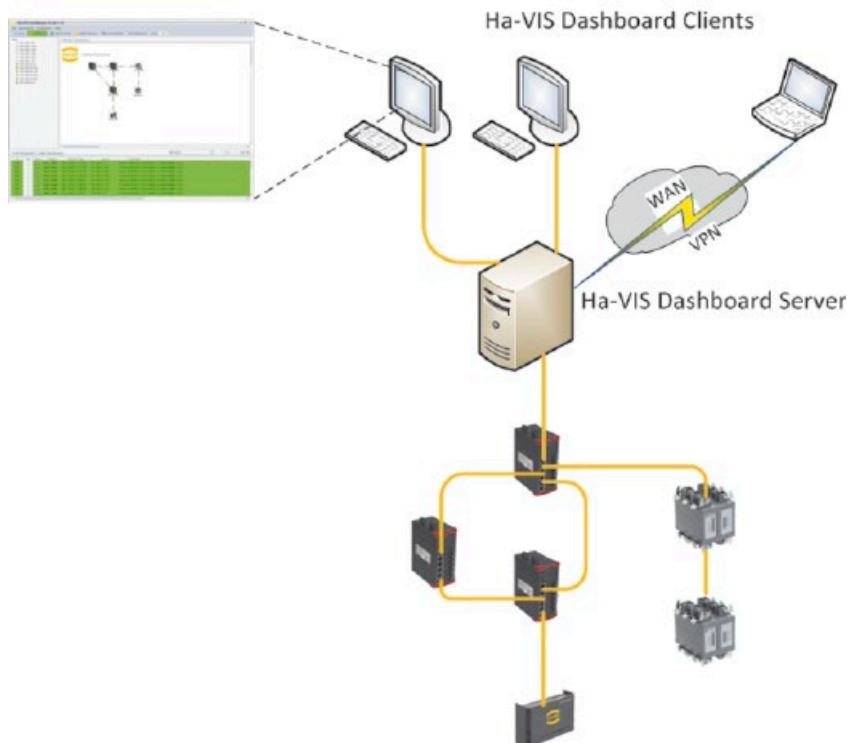

The Ha-VIS Dashboard features web-based configuration, SNMP, Telnet and SSH for configuring network devices.

The software provides centralized monitoring and configuring for an Ethernet network with up to 256 network devices. The Ha-VIS Dashboard also enables you to analyse the network load by illustrating the link and port based loads in a graph over a period of 30 minutes.

General description

You can also configure the Ha-VIS Dashboard so that external programs are integrated into its context menu. This feature allows the Ha-VIS Dashboard to be used together with other applications in a centralized display and management software system.

The Ha-VIS Dashboard can be installed as a local installation or as a server-client application, depending on your requirements. The server-client installation minimizes the network traffic generated by the monitoring process and centralizes data storage, since the key processes all run on a central server.

A VPN connection from the client can be used to establish a wide-area network (WAN) link so that the full functionality of Ha-VIS Dashboard is available on the client.

Technical Characteristics

Functionality

- Centralized management application for HARTING network devices
- Network topology visualization with all managed network devices
- Automatic topology detection based on LLDP
- Manages up to 256 network devices (basic version: 16)
- Third party devices can be included
- Link down detection and visualization
- Event logging
- Event triggered email messages or call of executable files are possible
- Possible to configure devices via SNMP, Telnet, SSH or web interface
- SNMP Trap handling
- Traffic monitoring per connection
- Possible to start up external applications
- Device images and background image are changeable
- Server-Client application with up to 5 parallel clients

Hardware

- CPU: Minimum 2 core processor with 2.5 GHz, x86 or x64 compatible
- RAM: Minimum 1 GB
- Hard Drive: Minimum 1 GB

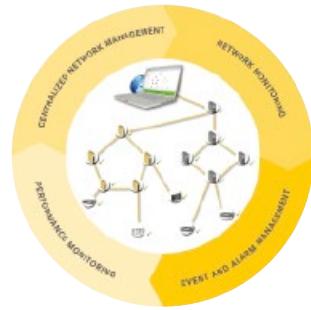

Software

Operating Systems

- Windows XP
- Windows 7
- Windows Server 2003
- Windows Server 2008

Java

- Java Runtime Version 1.6.0_29 or newer

Ha-VIS Dashboard

Advantages

- Centralized management for managed Ethernet devices
- Network monitoring
- Event and alarm management
- Performance monitoring

Energy Management System

Advantages

- User-defined reports in various formats, with periodic automatic shipping: load profile curve, ABC analysis, Sankey diagram, heat map analysis, etc.
- Formula-based performance measurement system
- Monitoring of systems, measurements and metrics; with user-group alarm functionality
- Wide variety of interfaces: Modbus RTU and TCP, mbus, S0, CSV, SQL, OPC-UA, etc.
- Every Ha-VIS smartPN unit has digital outputs which can be switched automatically and manually.
- Complete web-based system including SQL database

General description

Companies nowadays must monitor and actively manage their energy consumption and associated costs. The smart Power Networks system provides the basis for measuring all relevant energy flows and for optimising the data in a beneficial way. Measuring equipment is interfaced with smart Power Network Units which monitor, convert and forward their data over the Ethernet to centralized software modules. Our integrated network switch can be used to expand your network and to enhance your management capabilities.

The web-based software can be configured to fit your requirements. It provides a messaging/alarm system, evaluative functionality, and a reporting function for automatically generating periodic user-defined reports. The live-view function enables you to analyse live measurement values.

This system provides the necessary conditions for a DIN EN ISO 50 001 certification.

Ha-VIS smartPN Unit Managed switch with interfaces for recording measurement data	20 74 112 4611	
Ha-VIS smartPN Suite smart Power Networks software	20 74 000 5110	

System description

Measuring

The key to energy management is being able to record all of the company's relevant consumption-based power data. The power usage of your main consumer loads must be measured and analysed for optimisation potential. In addition to the electrical loads which are recorded using these current transformers and meters, you should also be able to measure air consumption, heating energy and cooling capacity. This is why the smart Power Network provides all standard industrial interfaces for connecting any of your existing and other conventional meters.

Collecting data

The smartPN unit collects this measurement data, validates it, and checks that it is within the specified limits. The data is then forwarded via TCP/IP to your database. The data can be saved to the unit itself if your database is unreachable. The smartPN unit integrates into your existing network infrastructure so that you can use it to capture measurement data wherever you have network connectivity. The integrated switch also permits you to expand your network and connect to network-compliant meters directly. The management functionality (including RSTP, MRP and VLAN) makes it is easy to use in a modern industrial network environment.

Evaluating

Data is processed in the central module of the Ha-VIS smartPN software suite and then displayed using the web interface. This is where consistency checks are run, metrics and virtual measuring points are determined, and automatic reports are generated.

The following functions are available:

- Individually customized and configured briefing reports and overviews
- Line, column and pie charts
- Sankey diagrams, heat maps and ABC analyses
- Comparisons of time and measuring points
- User-defined evaluation rules
- User groups can be specified for alarm and messaging functions

Optimising

Based on this data and the many evaluative options, you can quickly and easily discover where your power saving potential lies. You can also demonstrate the potential savings that would be generated by any implemented changes. The live-view function enables you to get a detailed analysis of individual measurements: values are displayed directly with minimal delays so that you can analyse routines such as a machine's start-up behaviour.

Services

HARTING supports you during the planning and implementation of your smart Power Networks energy management system. You can take advantage of our installation, configuration and maintenance service contracts, or use these services on an as-needed basis.

Industrial DC/DC converter
Serial Ha-VIS pCon 7000
for centralised power supply
with degree of protection IP20 / IP65

General Description

These primary switched DC/DC converters of the product family Ha-VIS pCon 7000 are designed for the decentralised supply of control units, Ethernet components or automation devices in industrial areas and harsh environments.

With their wide range of input voltage, the units are suitable for world-wide use.

The converters need no ground load and are short-circuit protected by primary and secondary power limitation.

The converters are maintenance free, vacuum potted and prepared for the use in devices with Protection Class I or II, depending on the type of the converter.

Features

- Wide input range for world-wide use
- Easy installation
- Galvanically separated
- Short circuit protected
- Ambient Temperature up to 70 °C
- High degree of protection IP65 / IP67

Advantages

- Robust housing
- Wide operating temperature range
- Mechanical stability for highest demands
- Can be used directly in industrial and railway environments
- Compact design and high power density
- Proofed against short-circuits, overloads and no-load operation
- International approvals

Application fields

- Industrial automation
- Automotive industry
- Railway applications
- Power generation and distribution

DC/DC converter

Accessories Ha-VIS SFP modules

General description

SFPs (Small Form-factor Pluggable) are small standardized modules for network connections.

These modules are a specification for a new generation of modular optical transceivers. The devices are constructed as connecting plugs for extremely quick network connections.

The SFPs are available in a variety of models, depending on the cable type (multi-mode or single-mode), the wave length (850 nm, 1300 nm, 1550 nm or CWDM), data rate or range.

Copper-based SFP are also available.

Features

- Highly flexible
- Easily swapped out in event of malfunction
- Hot swappable
- Variants:

	SM fibre	MM fibre
100 Mbit/s	X	X
1000 Mbit/s	X	X

Advantages

- SFP used as connecting plug for extremely quick network connections
- Standardized modules for network connections

Application fields

- Industrial automation
- Automotive industry
- Wind power

Accessories Ha-VIS Memory cards

The HARTING SD cards are used for saving the switch configuration. The web interface can be used to save the current configuration to the SD card.

If an SD card is inserted in the back of the switch, the switch will use the configuration saved on the card when it boots.

So it's quite easy when replacing a switch to transfer the entire configuration to the new switch. The old SD card with your current configuration is simply pushed into the new switch which then boots with these settings. No special network expertise is required.

Note: The HARTING Ethernet Switches are not compatible with conventional memory cards.

MRP memory cards allow you to activate the MRP functionality (media redundancy protocol) when using switches from the FTS 3000 and mCon 3000 series (with firmware ver. 3.0.0.1 and later). For example, in order to operate the device as an MRP Ring Client, you need only have the corresponding MRP Ring Client card inserted during operations.

Operating temperature -40 °C ... +70 °C

Memory space 128 MB

Ha-VIS 19" DIN-Rail Mounting kit

The 19" mounting kit has been designed to install DIN-Rail mounted systems in a standard 19" rack.

The mounting kit is modular and very flexible. The DIN-Rail position can be changed in a very easy way. It can be installed in a horizontal or in a vertical position.

Each mounting kit has a cable management at the backside.

Features:

- 19 inch / 3 U
- Flexible installation
- Variable mounting
- Integrated mounting rail
- Robust design

Connector types RJ45, overmoulded, with locking lever protection

Cable types 4 x 2, Twisted Pair, shielded, S/FTP

Category 7 acc. to IEC 61 156-6, EN 50 288-4-2

Sheath material PUR, halogen free LSZH

Wiring 8-pole, 1:1 or crossed

Transmission performance Category 6 / Class E up to 250 MHz
acc. to ISO/IEC 11 801:2002, EN 50 173-1

Transmission rate 10/100/1000 Mbit/s

Shielding Fully shielded, 360° shielding contact

Operating temperature range 0 °C ... +60 °C

Standard lengths 0.5 m / 1 m / 2 m / 3 m / 5 m / 10 m
other lengths available on request

Colour Yellow

Advantages

Robust industrial design

Easy handling for all applications

Halogen free

RoHS compliant

Connection cable RJ45/RJ45, shielded 1:1 pinout and featuring DualBoot® overmolding incl. unlock protection. This patch cable is suitable for installations in offices and data centers.

Plugs are optimized for applications in high density switches. Use of DualBoot® overmolding ensures optimal strain relief and eliminates catching of locking levers.

Service mapping may also be effected at a later point in time via the application of colour coding (special accessory). The patch cable provides maximum data reliability via its foil shield and 360° shielded RJ45 plugs.

-----	-------------------------------------	--------	-------------------------------------	--------	--------------------------	---------	--------------------------	--------	-------------------------------------	---------	--------------------------	--------	--------------------------

- Universal use for PROFINET and Industrial Ethernet cabling in control cabinets
- Compact and space saving plug by HARTINGs Dual-Boot design
- Very robust locking lever protection and unlocking latch
- Reliable data transmission due to high EMC-immunity

The new Cat. 6 S/FTP patch cable completes the HARTING cabling solutions for industrial applications.

It is specially designed for the use in electrical cabinets and fulfills the PROFINET requirements. The design leads to a high flexibility and the innovative two-piece molding features to a good handling and a robust bending protection.

The double screened cable is EMC-safe against the unavoidable emitters in electrical cabinets.

The cable jacket is out of PVC, which is flame retardant and RoHS conform.

RJ45 cords

Identification	Part number	Drawing
PROFINET cabinet cord 8-wire		<ul style="list-style-type: none"> RJ45 acc. to IEC 60603-7 Boot black Locking lever protection and unlocking latch Cable: S/FTP AWG 26/7 PVC cable, jacket green Wiring 1:1 TIA/EIA-568-B, 8-wire 100 % electrical tested

Technical characteristics

Performance	Cat. 6 / Class E acc. to ISO/IEC 24 702 resp. ISO/IEC 11 801, Cat. 6 acc. to IEC 61 935-2 Cable: Cat. 6A acc. to IEC 61 156-6
--------------------	-------------------------------------------------------------------------------------------------------------------------------------

Mechanical characteristics

Bending protection	
Locking lever protection	
Bending radius	Repeated bending radius ≥ 55 mm Single bending radius ≥ 30 mm
Lateral force	1000 N

Electrical characteristics

Characteristic impedance	100 ± 5 Ohm
Loop resistance	≤ 290 Ohm/km
Delay skew	≤ 20 ns/100 m
Wiring	1:1 TIA/EIA-568-B
Coupling attenuation	≥ 80 dB (segregation class d)

Environmental characteristics

Protection class	IP20
Flame retardant	acc. to IEC 60 332-1-2

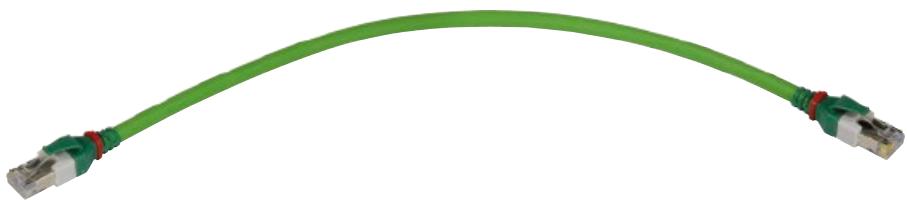

Thermal characteristics

Operating temperature	- 20 °C ... + 70 °C

Cable types

4 x AWG 22/7, Star quad, double shielding

Sheath material

PUR / PVC

Wiring

4-pole

Transmission performance

Cat. 5e / Class D up to 100 MHz
acc. to ISO/IEC 11 801:2002, EN 50 173-1

Transmission rate

10/100 Mbit/s

Shielding

Fully shielded, 360° shielding contact

Operating temperature range

-25 °C ... +70 °C

Standard lengths

1 m / 3 m / 5 m / 10 m
other lengths available on request

Colour

Green / Black
Red (SERCOS III)

Advantages

- Robust design
- PUR variants are useable as trailing cables
- PROFINET compliant

Notes

M12 cords

HARTING M12 circular connector,
D-coded, overmoulded

General information

Nominal voltage	60 V DC
Design	IEC 61 076-2-101 D-coded
No. of contacts	4
Rated impulse voltage	2.5 kV
Contact resistance	10 mOhm
Insulation resistance	> 100 MOhm
Rated current	4 A @ 40 °C / every contact
Temperature range moveable cable	-40 °C ... +85 °C
Temperature range fixed cable	-40 °C ... +85 °C
Pollution degree	3
Protection	IP65 / IP67
Insertion and withdrawal force	Insertion 10 N max. Withdrawal 15 N max.
Mating cycles	100
Transmission performance	Category 5e acc. to ISO/IEC 11 801
Transmission rate	10/100 Mbit/s
RoHS - compliant	Yes

Insulator material

Colour	Black
Material group acc. IEC 60112	CTI 600

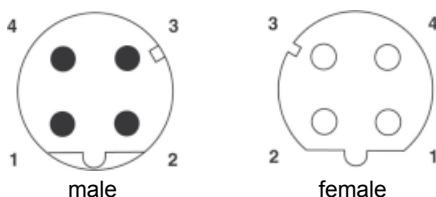

Contact material

Contact material	Copper alloy
Plating contact zone	Ni / Au

Assembly instructions

Recommended tightening torque	0.6 Nm
Width across flats	13 mm

Mating face acc. IEC 61 076-2-101 D-coded

Cable information – Ether Rail®

Cable type	1x4xAWG22/7
Cable sheath diameter	6.6 ± 0.2 mm
Colour	Black
Wire construction	4 x stranded copper wire, tin-plated, AWG 22/7 x 0.25 mm
Wire insulation	Insulation PE, Comp. 717, Ø 1.5 mm
Cable jacket material	Elastomer, electron beam cross-linked Comp. 603
Min. bending radius repeat bending	6 x cable diameter
Min. bending radius singular bending	5 x cable diameter
Transmission performance	Category 5e acc. to EN 50 288-2-1, IEC 61 156-6 acc. to ISO/IEC 11 801 and EN 50 173
Transmission rate	10/100 Mbit/s

Cable type	1x4xAWG22/19
Cable sheath diameter	7.4 ± 0.1 mm
Colour	Black
Wire construction	4 x stranded copper wire, tin-plated, AWG 22/19 x 0.16 mm
Wire insulation	Insulation PE, Comp. 655, Ø 1.98 mm
Cable jacket material	Elastomer, electron beam cross-linked Comp. 603
Min. bending radius repeat bending	12 x cable diameter
Min. bending radius singular bending	6 x cable diameter
Transmission performance	Category 5/5e acc. to EN 50 288-2-1, IEC 61 156-6 acc. to ISO/IEC 11 801 and EN 50 173
Transmission rate	10/100 Mbit/s

HARTING Ethernet cabling – M12 cords

har-speed M12
System cable, 8-wire
har-speed M12 connector cable for IP65 / IP67 applications

PUR	<input checked="" type="checkbox"/>	8 wire	<input checked="" type="checkbox"/>	4 wire	<input type="checkbox"/>	Cat. 5e	<input type="checkbox"/>	Cat. 6	<input type="checkbox"/>	Cat. 6A	<input checked="" type="checkbox"/>	Cat. 7	<input type="checkbox"/>
-----	-------------------------------------	--------	-------------------------------------	--------	--------------------------	---------	--------------------------	--------	--------------------------	---------	-------------------------------------	--------	--------------------------

Connector types har-speed M12 connector X coding acc. to IEC 61076-2-109

Cable types 4 x 2, Twisted Pair, shielded

Sheath material PUR

Wiring 8-pole, 1:1

Transmission performance Category 6A / Class EA up to 500 MHz
acc. to ISO/IEC 11 801:2002, EN 50 173-1

Transmission rate 10/100/1000 Mbit/s / 1/10 Gbit/s

Shielding Fully shielded, 360° shielding contact

Operating temperature range -40 °C ... +70 °C

Standard lengths 0.5 m / 1 m / 1.5 m / 2 m / 2.5 m
other lengths available on request

Colour Yellow

Advantages

- Very robust metal housing M12 with degree of protection IP65
- Vibration proof crimp connection
- Maximum data rates through the configuration of the contacts in conformance with Ethernet technology
- Minimal interaction and perfect shielding through paired shielding of the contacts
- Fault proof connection through coding of the connector face.
A connection error with other 8-pole M12's is impossible
- PROFINET compliant Type X mating face

HARTING RJ Industrial® 10G connector set RJ45, 8-poles

Advantages

- RJ45 Ethernet-Data connector suitable for industry
- Field-assembly with HARAX® quick termination in IDC technology
- Compact design
- Ergonomically unlocking clip
- Less weight assures shock- and vibration resisting connection
- Category of transmission Cat. 6
- Suitable for solid and stranded wires
- Suitable for PoE (IEEE 802.3af) and PoE+ (IEEE 802.3at)

Technical characteristics

Connector type	RJ45 connector acc. to IEC 60 603-7
Number of contacts	8
Transmission category	Category 6, class E _A , suitable for 1/10 Gigabit Ethernet
Transmission performance	Category 6 / Class E _A up to 500 MHz acc. to ISO/IEC 11 801:2002, EN 50 173-1
Transmission rate	10/100 Mbit/s and 1/10 Gbit/s
Shielding	fully shielded, 360° shielding contact
Mounting	Field-assembly
Cable termination	with IDC-contacts, without tools
Connectable cables	<ul style="list-style-type: none"> - Conductor cross section AWG 27 ... AWG 22 (solid / stranded) - Conductor diameter max. 1.6 mm (incl. insulation) - Cable diameter 4.5 ... 9 mm (straight version) - Cable diameter 4.5 up to 8 mm (45° angled version)
Mating cycles	min. 750
Degree of protection	IP20
Temperature range	-40 °C ... +70 °C
Housing material	Polyamide, UL 94-V0

¹⁾ Packaging with 100 sets

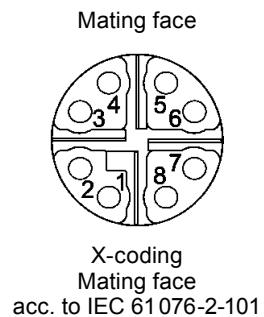

Han® 3 A RJ45 10G
Connector set, 8-pole
to build-up Han® 3 A RJ45 system cables

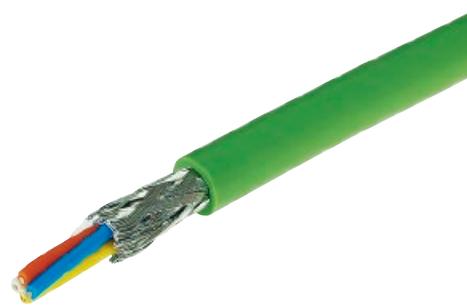

Technical characteristics

Connector type	Han® 3 A RJ45 connector
Number of contacts	8
Transmission performance	Category 6 / Class EA up to 500 MHz acc. to ISO/IEC 11 801:2002, EN 50 173-1
Transmission rate	10/100 Mbit/s / 1/10 Gbit/s
Shielding	Fully shielded, 360° shielding contact
Mounting	Field-assembly
Wire termination	Via IDC contacts , tool-less
Cable options	
– Strand gauge	AWG 27 ... AWG 22 (solid, stranded)
– Strand diameter	max. 1.6 mm (including insulation)
– Cable sheath diameter	5 mm ... 9 mm
Degree of protection	IP65 / IP67
Operating temperature range	–40 °C ... +70 °C
Plastic version	
Housing material	Polyamide, UL94 V-0
Colour	Black
Metal version Standard	
Housing material	Zinc, die-cast
Colour	Grey
Advantages	<ul style="list-style-type: none"> • Robust metal housing • Field-assembly connector, IP65 / IP67

Industrial Cat. 5e Standard cable, 4-wire

Type A

for permanent installation or to build-up PROFINET system cables

PVC	<input checked="" type="checkbox"/>	8 wire	<input type="checkbox"/>	4 wire	<input checked="" type="checkbox"/>	Cat. 5e	<input checked="" type="checkbox"/>	Cat. 6	<input type="checkbox"/>	Cat. 6A	<input type="checkbox"/>	Cat. 7	<input type="checkbox"/>
-----	-------------------------------------	--------	--------------------------	--------	-------------------------------------	---------	-------------------------------------	--------	--------------------------	---------	--------------------------	--------	--------------------------

Cable structure Star quad, double shielding

Core structure 4 x AWG 22/1, solid

Wire insulation PE, Ø 1.5 mm

Sheath material PVC

Cable sheath diameter 6.5 mm

Transmission performance Category 5e / Class D up to 100 MHz
acc. to ISO/IEC 11 801:2002, EN 50 173-1

Transmission rate 10/100 Mbit/s

Shielding Shielding foil and shielding braid

Operating temperature range -40 °C ... +75 °C

Standard lengths 20 m / 50 m / 100 m / 500 m

Colour Green

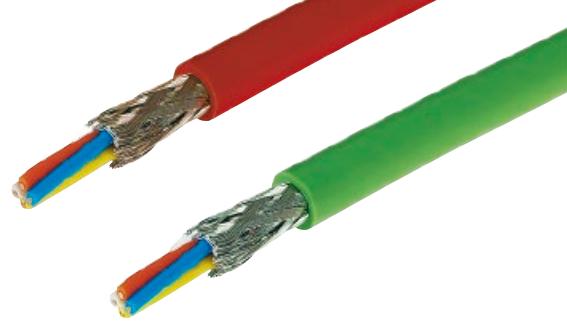

Printing HARTING specific printing

Advantages

- Robust design suitable for industry
- PROFINET compliant
- Easy stripping of cable sheath and screening braid with stripping tool **09 45 800 0000**
- RoHS compliant

HARTING RJ Industrial® PN connector set RJ45, 4-poles

Advantages

- RJ45 Ethernet-Data connector suitable for industry
- Field-assembly with *HARAX®* quick termination in IDC technology
- Compact design
- Ergonomically unlocking clip
- Less weight assures shock- and vibration resisting connection
- Category of transmission Cat. 5e
- Suitable for solid and stranded wires
- Suitable for PoE (IEEE 802.3af) and PoE+ (IEEE 802.3at)

Technical characteristics

Connector type	RJ45 connector acc. to IEC 60 603-7
Number of contacts	4
Transmission category	Category 5e, class D, suitable for 1/10 Gigabit Ethernet
Transmission performance	Category 5e / Class D up to 100 MHz acc. to ISO/IEC 11 801:2002, EN 50 173-1
Transmission rate	10/100 Mbit/s
Shielding	fully shielded, 360° shielding contact
Mounting	Field-assembly
Cable termination	with IDC-contacts, without tools
Connectable cables	<ul style="list-style-type: none"> - Conductor cross section AWG 27 ... AWG 22 (solid / stranded) - Conductor diameter max. 1.6 mm (incl. insulation) - Cable diameter 4.5 ... 9 mm (straight version) 4.5 up to 8 mm (45° angled version)
Mating cycles	min. 750
Degree of protection	IP20
Temperature range	-40 °C ... +70 °C
Housing material	Polyamide, UL 94-V0
Colour	black

Han® 3 A RJ45
Connector set, 4-pole
to build-up Han® 3 A system cables RJ45

Technical characteristics

Connector type	Han® 3 A RJ45 connector acc. to IEC 61 918
Number of contacts	4
Transmission performance	Category 5e / Class D up to 100 MHz acc. to ISO/IEC 11 801:2002, EN 50 173-1
Transmission rate	10/100 Mbit/s
Shielding	Fully shielded, 360° shielding contact
Mounting	Field-assembly
Wire termination	Via IDC contacts, tool-less
Cable options	
– Strand gauge	AWG 24/7 ... AWG 22/7 (stranded)
– Strand diameter	AWG 23/1 ... AWG 22/1 (solid)
– Cable sheath diameter	max. 1.6 mm 5 mm ... 9 mm
Degree of protection	IP65 / IP67
Operating temperature range	-40 °C ... +70 °C

Plastic version	
Housing material	Polyamide, UL94 V-0
Colour	Black
Metal version Standard	
Housing material	Zinc, die-cast
Colour	Grey
Metal version M	
Housing material	Zinc, die-cast
Colour	Black

Advantages

- Tool-less field-assembly with HARAX® rapid termination in IDC technology
- Category of transmission Cat. 5e
- Coding possible
- Up to 10x reconductable
- PROFINET compliant

Identification	Part number	Drawing	Dimensions in mm

HARAX® M12
 Connector D-coding, 4-pole
 to build-up HARTING system cables M12

Technical characteristics

Connector type	<i>HARAX®</i> connector M12-L, D-coding
Number of contacts	4
Transmission performance	Class D acc. to ISO/IEC 11 801:2002
Transmission rate	10/100 Mbit/s
Shielding	Fully shielded, 360° shielding contact
Mounting	Field-assembly
Wire termination	Via IDC contacts
Cable options	
– Strand diameter	AWG 26 ... AWG 22 (Cord)
– Cable sheath diameter	4.5 mm ... 8.8 mm
Degree of protection	IP65 / IP67
Operating temperature range	-25 °C ... +85 °C
Housing material	Metal

Advantages	Field-assembly M12 connector Compact design Tool-less assembly

Ha-VIS preLink® RJ45 connector

Advantages

- RJ45 Ethernet-Data connector suitable for industry
- Compact and robust design
- 360° shielding
- Ergonomically unlocking clip
- Category of transmission Cat. 6A
- Suitable for solid and stranded wires
- Suitable for PoE (IEEE 802.3af) and PoE+ (IEEE 802.3at)

Technical characteristics

Connector type	RJ45 connector acc. to IEC 60 603-7
Number of contacts	8
Transmission category	Category 6A, Class E _A , suitable for 1/10 Gigabit Ethernet
Transmission performance	Category 6A / Class E _A up to 500 MHz acc. to ISO/IEC 11 801:2002, EN 50 173-1
Transmission rate	10/100 Mbit/s and 1/10 Gbit/s
Shielding	fully shielded, 360° shielding contact
Mounting	IDC termination
Cable termination for preLink® terminal module, yellow, 20 82 000 0001	
Connectable cables	
– Conductor cross section	AWG 23 ... AWG 22 (solid and stranded)
– Conductor diameter	1.3 ... 1.6 mm
Cable termination for preLink® terminal module, white, 20 82 000 0003	
Connectable cables	
– Conductor cross section	AWG 27 ... AWG 26 (solid and stranded)
– Conductor diameter	0.8 ... 1.1 mm
Cable diameter	5 ... 9 mm
Degree of protection	IP20
Mating cycles	min. 750
Temperature range	-40 °C ... +70 °C
Housing material	Zinc die-cast, nickel-plated

¹⁾ Packaging with 10 pieces

Ha-VIS preLink® RJ45 jacks (HIFF)

Advantages

- Compact and robust design
- Category of transmission Cat. 6
- Suitable for solid and stranded wires
- Compatible with HIFF dimensions for use in:
 - Han® 3 A series with HIFF adapter 09 45 515 0024
 - HARTING PushPull (V4)

Compact bulkhead mounting housing	09 45 545 0028
EasylInstall bulkhead mounting housing	09 45 545 0032
 - Han® PushPull (V14)

Panel feed-through plastic	09 35 012 0331

Ha-VIS preLink®
19" Patch panel, HIFF

Advantages

- Flexible, suitable for Ha-VIS preLink® modules RJ45 jack and HARTING RJ Industrial® modules in HIFF size
- Economical, time-saving installation due to the slideable module carrier, frontward and backward removal
- Safety, additional strain-relief
- Fully shielded modules connected by module carrier
- Earth bolt
- IP20 installation for distributors and switch cabinets

Technical characteristics

Number of modules	24
Transmission performance	Category 6 / Class EA up to 500 MHz acc. to ISO/IEC 11 801:2002, EN 50 173-1
Transmission rate	up to 10 Gbit/s
Assembly	in 19" racks acc. to IEC/DIN EN 60 297-3-100 (DIN 41 494-1)
Dimensions (W x H x D)	482.6 mm (19") x 44.5 mm (1 U) x 181 mm
Degree of protection	IP20
Operating temperature range	-40 °C ... +70 °C
Material module carrier, 2-parts front cover	steel sheet stainless steel

Ha-VIS preLink®
HIFF RJ45 AP Box

Advantages

- Flexible, suitable for on-wall mounting or for top-hat mounting rail (35 mm)
- Economical, time-saving installation due to the use of pre-assembled data cables with Ha-VIS preLink® termination
- Robust design, powder-coated steel plate housing
- Structured cabling for industrial premises

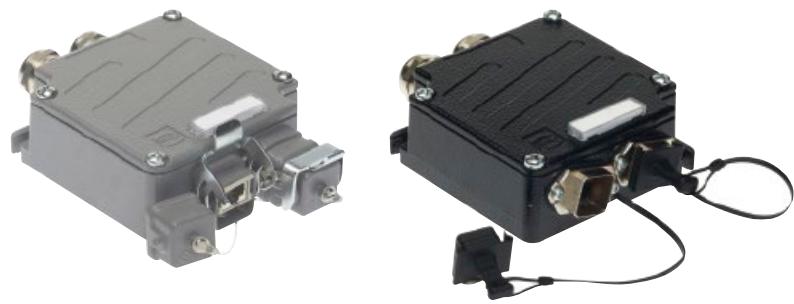

Technical characteristics

Number of ports, Copper / Termination	2 / RJ45 jack HIFF
Transmission performance	Category 6 / Class EA up to 500 MHz acc. to ISO/IEC 11 801:2002, EN 50 173-1
Transmission rate	up to 10 Gbit/s
Shielding	Fully shielded, 360° shielding contact
Cable diameter	5 mm ... 9 mm
Mounting	on-wall or DIN Rail
Dimensions (WxHxD)	60 x 81 x 70 mm
Degree of protection	IP20
Operating temperature	-40 °C ... +70 °C
Housing material	steel plate
Colour	Anthracite grey (RAL 7016)

Identification	Part number	Drawing	Dimensions in mm
Ha-VIS preLink® HIFF RJ45 AP Box	20 82 101 0220		Dimensions in mm: Front View: Height 81, Width 60, Depth 70. Side View: Height 81, Width 20, Depth 40. Top View: Height 15, Width 20.
Accessory DIN Rail mounting bracket	20 80 000 0003		Dimensions in mm: Front View: Height 50, Width 39, Depth 20. Side View: Height 15, Width 3.5.

Ha-VIS preLink®
Han® PushPull Metal Outlet
and Han® 3 A Metal Outlet

Advantages

- Simple mounting, fixing and earth connection both outside
- Fast termination of data cables due to Ha-VIS preLink® technology
- Structured cabling for industrial premises
- Mating face AIDA compliant, protection cover incl.
- PROFINET compatible

Technical characteristics

Number of ports, Copper / Termination	2 x Han® PushPull RJ45 (IP65 / IP67) or Han® 3 A RJ45
Transmission performance	Category 6 / Class EA up to 500 MHz acc. to ISO/IEC 11 801:2002, EN 50 173-1
Transmission rate	up to 10 Gbit/s
Termination	Ha-VIS preLink®
Wire gauge	AWG 24 ... 22 (0.25 mm² ... 0.34 mm²) solid and stranded
Strand diameter	Ø 1.3 mm ... 1.6 mm
Cable diameter	7.2 mm ... 8 mm
Shielding	Fully shielded 360° flexible shielding termination
Mounting	Wall mounting
Dimensions (H x W x D)	105 x 105 x 40.5 mm
Degree of protection	IP65 / IP67
Operating temperature range	-40 °C ... +70 °C
Housing material	Aluminium, die-cast
Colour	Black

Identification	Part number	Drawing	Dimensions in mm

²⁾ Packaging with 24 pieces

Ha-VIS preLink®
19" Patch panel, Keystone

Advantages

- Suitable for Ha-VIS preLink® RJ45 module in Keystone size
 - Economic due to easy design
 - Safety, additional strain-relief
 - Fully shielded modules connected through metal holding fixture
 - Earth bolt

Technical characteristics

Number of modules	24
Transmission performance	Category 6 / Class EA up to 500 MHz acc. to ISO/IEC 11 801:2002, EN 50 173-1
Transmission rate	up to 10 Gbit/s
Module design	Keystone size acc. to EN 60 603-7:2009
Assembly	in 19" racks acc. to IEC/DIN EN 60 297-3-100 (DIN 41 494-1)
Dimensions (W x H x D)	482.6 mm (19") x 44.5 mm (1 U) x 107 mm
Degree of protection	IP20
Operating temperature range	-40 °C ... +70 °C
Material	steel sheet

Identification	Part number	Drawing	Dimensions in mm

Range of delivery::: 24 pieces of: • Ha-VIS preLink® RJ45 Keystone jack • terminal modules for AWG 22 / 23 • strain relief			Depth: 107 mm
Ha-VIS preLink® 19" patch panel, Keystone empty	20 82 400 0002		

HARTING Cabinet Outlet RJ45, 8-poles
RJ45 distribution module for IP20 environments
(top-hat rail mounting)

Advantages

- Simple mounting
- Dust protection caps
- Port identification
- Angled output

Technical characteristics

Number of ports, Copper / Termination	1 / RJ45 (Twisted Pair)
Transmission performance	Category 6A / Class EA up to 250 MHz acc. to ISO/IEC 11 801:2002, EN 50 173-1
Transmission rate	10/100 Mbit/s and 1/10 Gbit/s
Mounting	To 35 mm top-hat mounting rail acc. to DIN EN 60 715, alignable
Dimensions (H x W x D)	71 x 18 x 68 mm
Degree of protection	IP20
Operating temperature range	-20 °C ... +70 °C
Housing material	Polyamide, UL94 V-0
Colour	Grey

Identification	Part No.	Drawing	Dimensions in mm

Ha-VIS preLink® Patch cables

Advantages

- Pre-assembled system cable, fast, flexible and reliable in the application
- Simple in handling
- Robust in design
- Installation of Ha-VIS preLink® cables for industrial environment
- Connection cable for control or distributor cabinets or within controllers

Technical characteristics

Cable types	4 x 2 AWG 27/7, shielded, S/FTP Cat. 7
Sheath material	PUR
Wiring	TIA/EIA 568B, 1:1
Transmission performance	Category 6 / Class EA up to 500 MHz acc. to ISO/IEC 11 801:2002, EN 50 173-1
Transmission rate	up to 10 Gbit/s
Shielding	Copper braid, tinned
Operating temperature range	-35 °C ... +70 °C
fixed operation	-5 °C ... +50 °C
flexible operation

Ha-VIS preLink® Extender

Advantages

- Simple, fast and reliable connection of data cables
- Compact and robust design
- 360° shielding
- Category of transmission Cat. 6A
- Suitable for solid and stranded wires

Technical characteristics

Connector type	RJ45 connector acc. to IEC 60 603-7
Number of contacts	8
Transmission category	Category 6A, Class E _A , suitable for 1/10 Gigabit Ethernet
Transmission performance	Category 6A / Class E _A up to 500 MHz acc. to ISO/IEC 11 801:2002, EN 50 173-1
Transmission rate	10/100 Mbit/s and 1/10 Gbit/s
Shielding	fully shielded, 360° shielding contact
Mounting	IDC termination
Cable termination for preLink® terminal module, yellow, 20 82 000 0001	
Connectable cables	
– Conductor cross section	AWG 23 ... AWG 22 (solid and stranded)
– Conductor diameter	1.3 ... 1.6 mm
Cable termination for preLink® terminal module, white, 20 82 000 0003	
Connectable cables	
– Conductor cross section	AWG 27 ... AWG 26 (solid and stranded)
– Conductor diameter	0.8 ... 1.1 mm
Cable diameter	5 ... 9 mm
Degree of protection	IP20
Mating cycles	min. 750
Temperature range	-40 °C ... +70 °C
Housing material	Zinc die-cast, nickel-plated

Application

- Extension of cables for data communication
- Connection of cables with different cross-sections
- Linking of fire compartments

Identification	Part number	Drawing	Dimensions in mm

D-coding
Mating face
acc. to IEC 61 076-2-101

Advantages

- M12 Ethernet-Data connector suitable for industry
- Robust design
- 360° shielding
- Suitable for solid and stranded wires
- Suitable for PoE (IEEE 802.3af) and PoE+ (IEEE 802.3at)

Technical characteristics

Connector type	M12 D-coding acc. to IEC 61 076-2-101
Number of contacts	4
Transmission category	Category 5, Class D, suitable for 1/10 Gigabit Ethernet
Transmission performance	Category 5 / Class D up to 200 MHz acc. to ISO/IEC 11 801:2002, EN 50 173-1
Transmission rate	10/100 Mbit/s
Shielding	fully shielded, 360° shielding contact
Mounting	IDC termination
Cable termination for preLink® terminal module, yellow, 20 82 000 0001

*har-port* RJ45 coupler

Advantages

- Compact and well-shaped service interface in a timeless attractive design
- Easy mounting
- Transmission category 6, performance class E_A, suitable for 1/10 Gigabit Ethernet
- Compact and robust design
- Practical accessories

Technical characteristics

Number of ports	2x RJ45
Transmission performance	Category 6 / class E _A acc. to ISO/IEC 11 801:2002, EN 50 173-1
Transmission rate	10/100 Mbit/s and 1/10 Gbit/s
Shielding	Fully shielded, 360° shielding contact
Mounting	Screwable in cover plates
Degree of protection	IP20
Mating cycles	min. 750
Temperature range	-25 °C ... +70 °C
Housing material	Polyamide

General

HARTING Ha-VIS RFID System components

Real-time information and the close synchronization of computer data and real processes play a critical role in process management and process optimization. Ensuring that information precisely maps and concurs with reality is the only way to control processes optimally and reap savings potentials accordingly. One important prerequisite for guaranteeing that data and processes are synchronized is an intelligent infrastructure that makes data transparent and available throughout a company in order to achieve the maximum savings potentials.

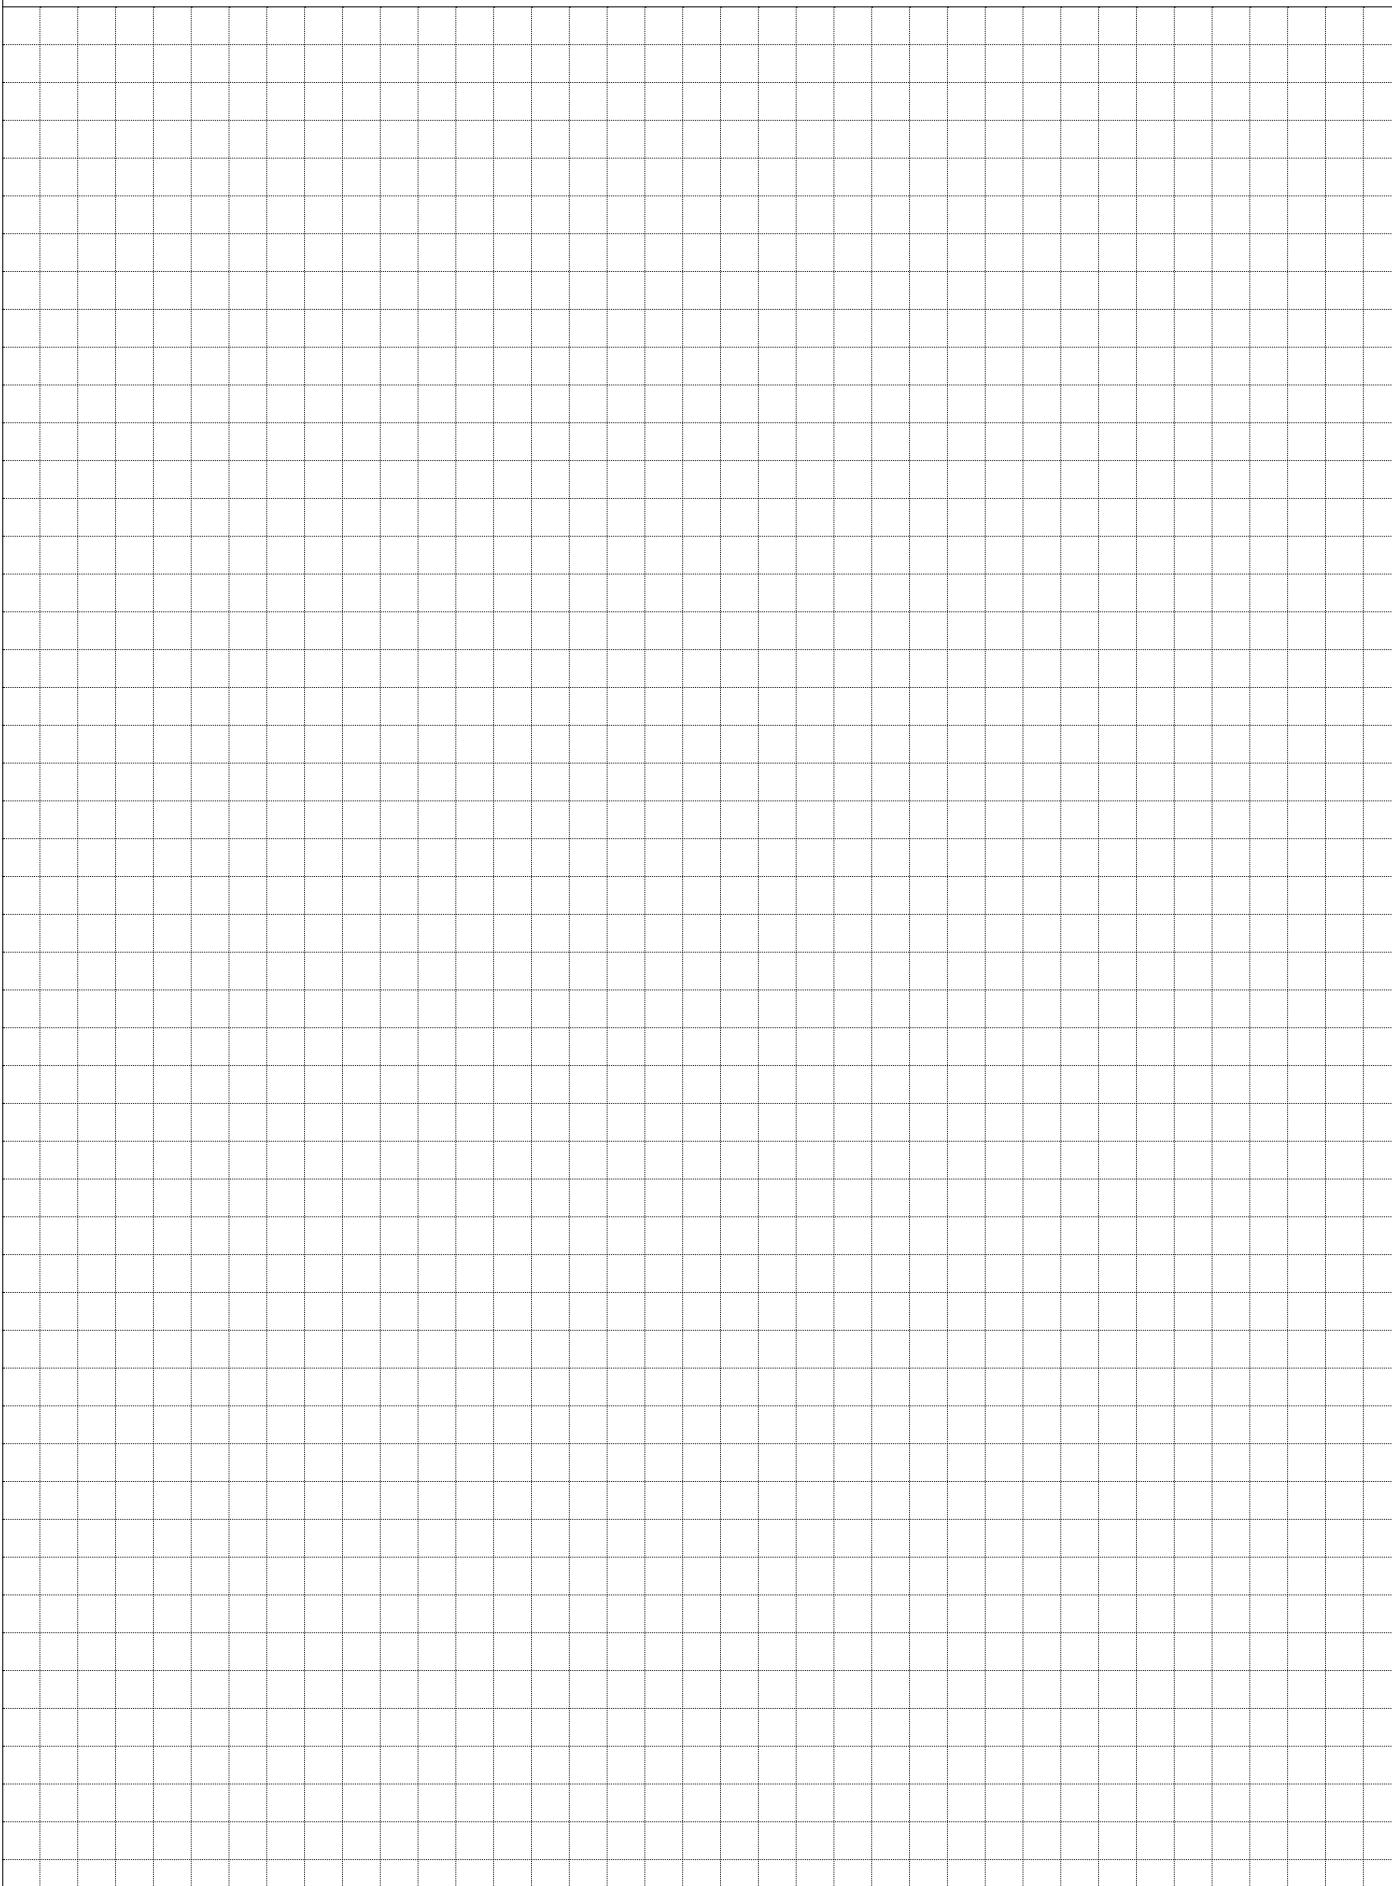

RFID offers you the full potential to create intelligent infrastructures: benefit from the simultaneous identification of up to several hundred objects - without the need for the direct line of sight as required by barcode solutions. The collected data are immediately ready for further processing throughout the company.

Moreover, a transponder can be used to store information directly on the product at the same time it is identified. This means that these data are also always available wherever the product may happen to be located.

HARTING offers smart infrastructure solutions based on optimally coordinated components from a single source. These solutions enable the reliable control and steering of production and business processes, thereby resulting in lower costs.

The HARTING RFID Reader and components have been designed for harsh industrial applications. Deployed in the transportation, machinery and energy markets, HARTING RFID components guarantee secure and reliable information processing - also under the most challenging environmental conditions

Ha-VIS RFID VT 86 S (HT)

Transponder
Ha-VIS RFID VT 86 S (HT)

Features

- Optimized for the EU band
- Very high read ranges, in relation to the housing dimension
- Robust, chemical resistant housing
- Small size
- Flexible mounting
- High temperature resistance
- Protection class IP69 K
- Integration in type labels possible

General Description

- Particularly robust and durable transponder for repair and maintenance cycles in extremely harsh environments
- Optimized for function on metal
- EPC C1 Gen2 compatible
- Read range (on metal, 2 W ERP, 868 MHz):
 $> 4 \text{ m}$

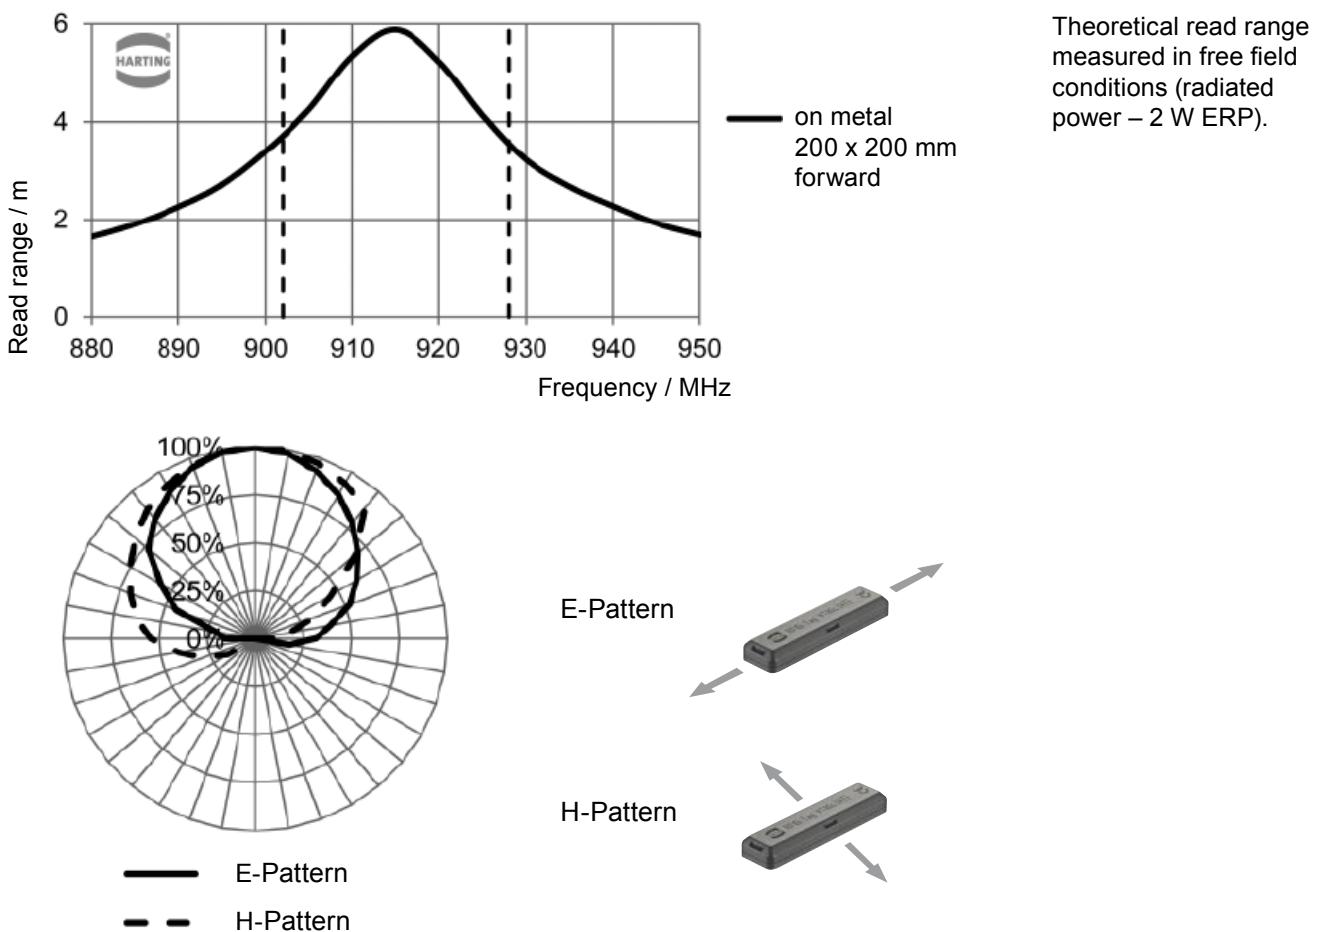

Identification	Part number	Drawing	Dimensions in mm
Ha-VIS RFID VT 86 S (HT)			
Packaging unit	10 pieces 50 pieces	20 92 611 0201 20 92 611 0202	

Technical characteristics

Frequency range	860 ... 870 MHz	EU Band
Protocol	EPC Class 1 Gen 2	
EPC / User Memory (Chip)	96 Bit / 512 Bit	(Alien Higgs 3)
Temperature range	Function Storage Thermal shock (0 °C to 210 °C) Thermal stress test (210 °C)	-50 °C ... +85 °C -65 °C ... +160 °C 5000 cycles 5000 h
Housing	Size (W x D x H) Protection class Mounting Colour	41 x 11 x 5.15 mm IP64 / IP67 / IP69K screws, glue black

Measurements

Read range / Radiation pattern

The general shape of the radiation pattern remains the same, regardless of:

- Placement of tag on different metallic surfaces

Ha-VIS RFID VT 92 S (HT)

Transponder
Ha-VIS RFID VT 92 S (HT)

Features

- Optimized for the US/Asia band
- Very high read ranges, in relation to the housing dimension
- Robust, chemical resistant housing
- Small size
- Flexible mounting
- High temperature resistance
- Protection class IP69K
- Integration in type labels possible

General Description

- Particularly robust and durable transponder for repair and maintenance cycles in extremely harsh environments
- Optimized for function on metal
- EPC C1 Gen2 compatible
- Read range (on metal, 2 W ERP, 915 MHz):
 $> 4 \text{ m}$

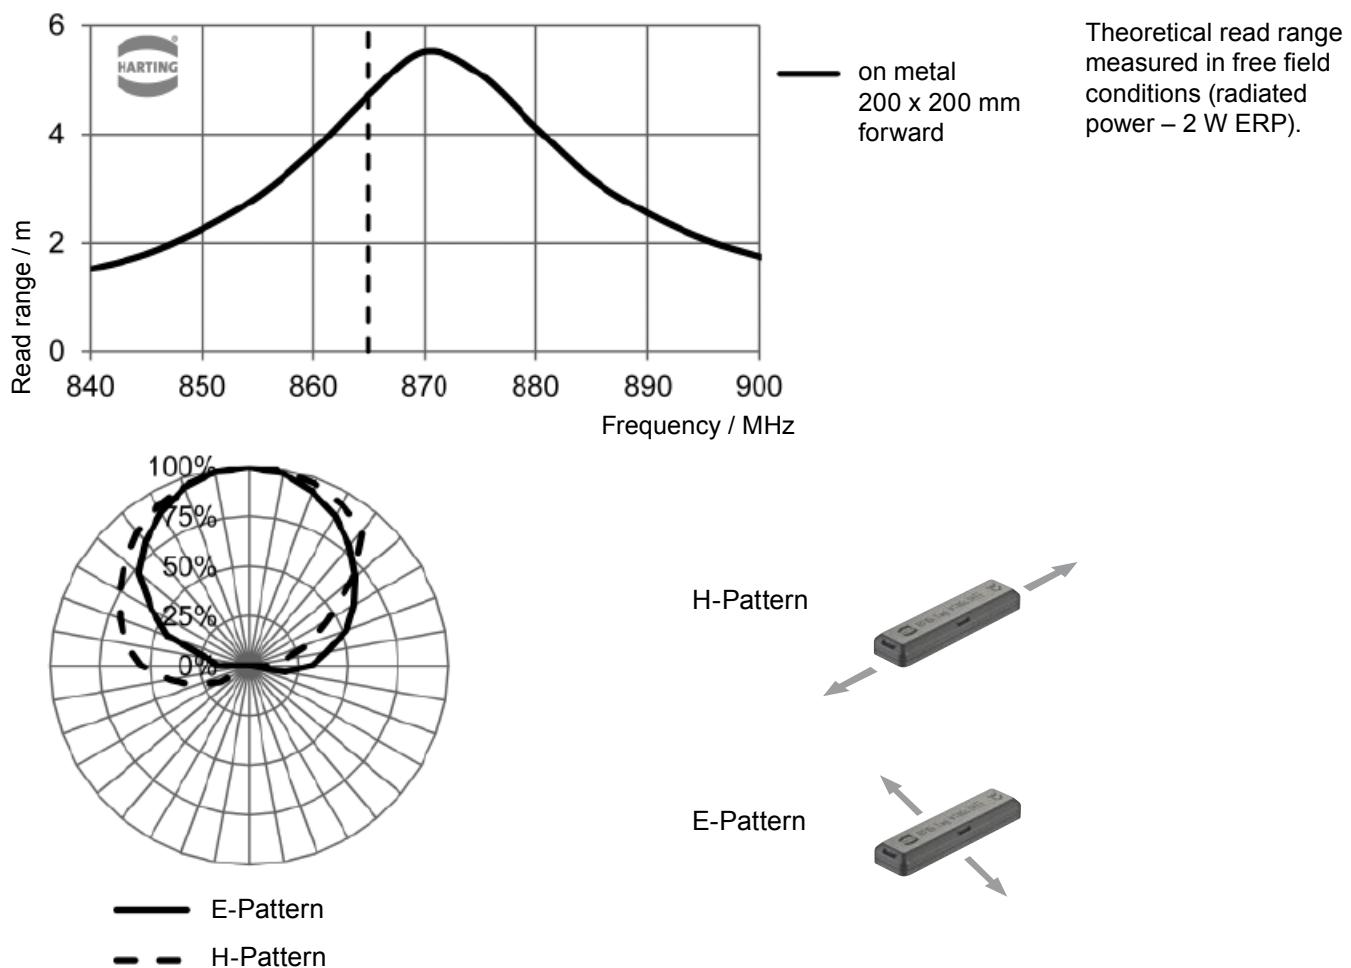

Identification	Part number	Drawing	Dimensions in mm

- Placement of tag on different metallic surfaces
- 868 MHz or 910 MHz

Ha-VIS RFID VT 86 L (HT)

Available
June 2015

Transponder
Ha-VIS RFID VT 86 L (HT)

Features

- Optimised for the EU frequency band
- Very high read ranges, in relation to the housing dimensions
- Increased memory (User Memory 3.3 kBit)
- Robust, chemically resistant housing
- Small size
- Flexible mounting
- High temperature resistance
- Protection class IP69K
- Integration in type labels possible

General description

- Particularly robust and durable transponder for repair and maintenance applications in extremely harsh environments
- Optimised for function on metal
- EPC Class 1 Gen 2 compatible
- Read range on metal, 2 W ERP, 868 MHz: up to 4 m

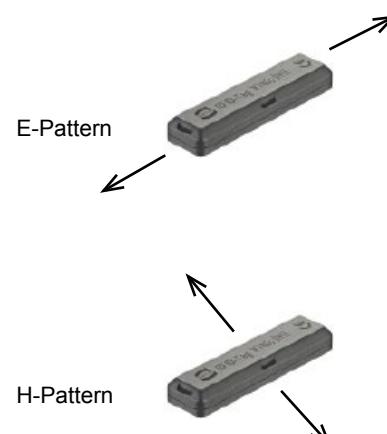

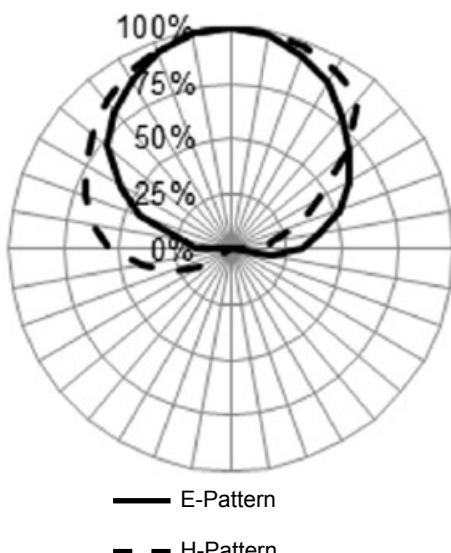

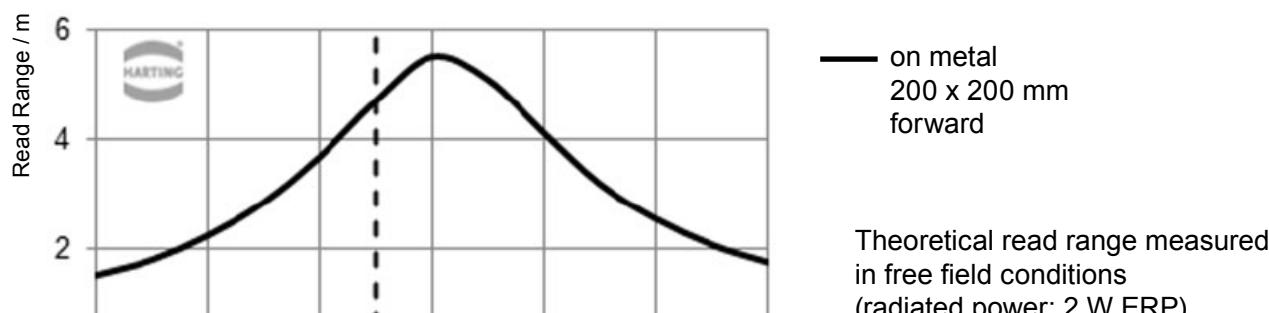

Identification	Part number	Drawing	Dimensions in mm
Ha-VIS RFID VT 86 L (HT) Packaging unit: - 10 pieces - 50 pieces	20 92 612 0201 20 92 612 0202		Dimensions in mm: Length: 41 mm Height: 5.15 mm Width: 11 mm Internal features: Top: Ø 2.5 mm, 7 mm height, 7.3 mm width, 4.75 mm depth, 1.8 mm gap. Bottom: 3 mm height, 7 mm width, 4.5 mm depth, 1.5 mm gap. Side: 7 mm height, 4 mm width, 4.5 mm depth.

Technical characteristics

Frequency range	860 ... 870 MHz, EU frequency band
Protocol	EPC Class 1 Gen 2
EPC / User Memory (Chip)	160 Bit / 3328 Bit (NXP UCODE I2C)
Read range	on metal, 2 W ERP, 868 MHz: up to 4 m
Temperature range	
Operational	-40 °C ... +85 °C
Storage	-55 °C ... +125 °C

Temperature range	Function	-32 °C ... +90 °C
	Storage	-32 °C ... +90 °C
Housing	Size (W x D x H)	74 x 29 x 0.7 mm
	Protection class	IP64 / IP67 / IP69K
	Mounting	glue
	Colour	white / flexible

Measurements

Read range / Radiation pattern

The general Shape of the Radiation Pattern remains the same, regardless of:

- 868 MHz or 910 MHz

Ha-VIS RFID FT 89 on metal (NT)

Transponder

Ha-VIS RFID FT 89 on metal (NT)

Features

- Global use possible thanks to wideband antenna design
- High read ranges on metal
- Scratch- and smudge-resistant by polycarbonate film
- Washable, resistant to chemicals
- Flexible mounting on different forms
- Flexible printing possible (barcode, datamatrix, custom logo / name)

General Description

- Applications on metallic and non-conducting surfaces
- Metal container detection
- Container management
- Asset management
- Intralogistic
- EPC C1 Gen2 compatible
- Read range (on metal, 2 W ERP): > 2 m

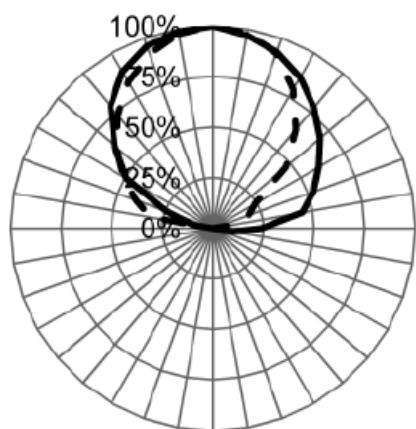

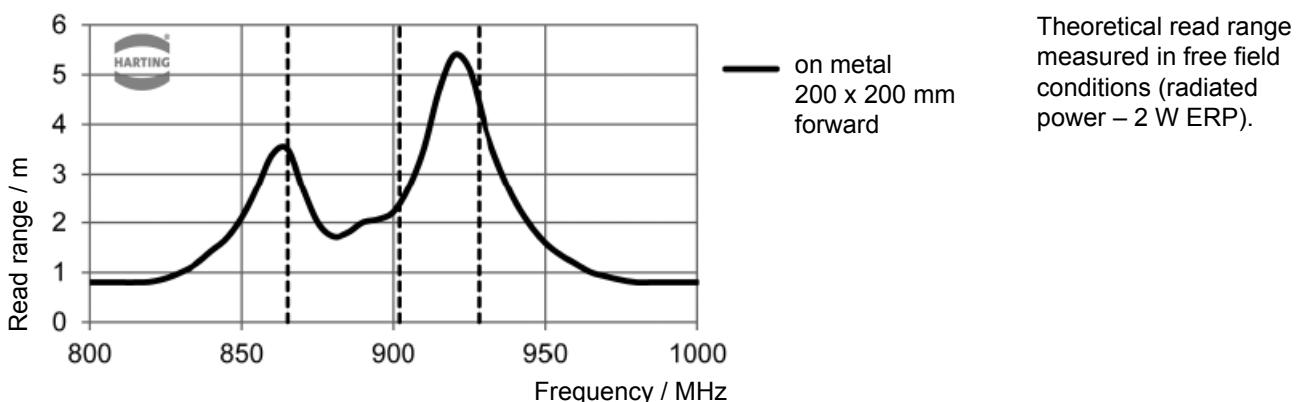

Identification	Part number	Drawing	Dimensions in mm

The general shape of the radiation pattern remains the same, regardless of:

- placement of tag on different metallic surfaces
- 868 MHz or 910 MHz

Ha-VIS RFID IT 86 S (NT)

Transponder
Ha-VIS RFID IT 86 S (NT)

Features

- Optimised for the EU frequency band
- Very high read ranges, in relation to the housing dimensions
- Very small size
- Flexible mounting on different surface shapes
- Supplied with 3M adhesive pad
- Holder for mounting option with cable ties included
- Protection class IP67
- Shock resistant

General description

- Very small on-metal transponder, with high read ranges
- Flexible options to integrate the Ha-VIS RFID IT 86 S (NT) on different metal surfaces
- Due to the small housing dimensions ideally suited for tool-tagging
- Optimised for function on metal
- EPC Class 1 Gen 2 compatible
- Read range on metal, 2 W ERP, 868 MHz: up to 3 m

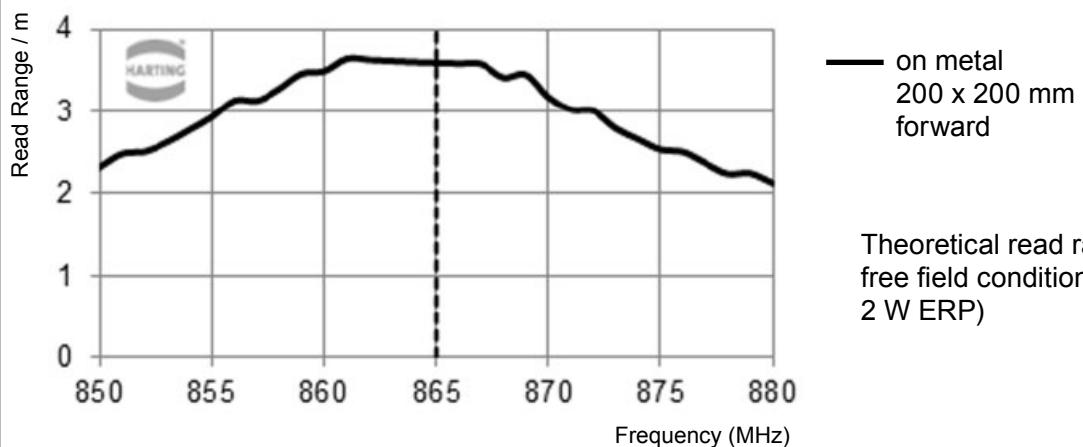

Identification	Part number	Drawing	Dimensions in mm
Ha-VIS RFID IT 86 S (NT) Packaging unit: - 10 pieces - 50 pieces	20 92 611 0901 20 92 611 0902		

Technical characteristics

Frequency range	860 ... 870 MHz, EU frequency band
Protocol	EPC Class 1 Gen 2
EPC / User Memory (Chip)	128 Bit / 512 Bit (Monza 4QT)
Read range	on metal, 2 W ERP, 868 MHz: up to 3 m
Temperature range	
Operational	-45 °C ... +105 °C
Thermal stress test	
• min. temperature	-45 °C / 1500 h
• max. temperature	+105 °C / 1500 h
Housing	
Dimensions (W x D x H)	15 x 5 x 3.5 mm
Protection class	IP67
Mounting	holder with cable tie, glue
Colour	white/black

Measurements

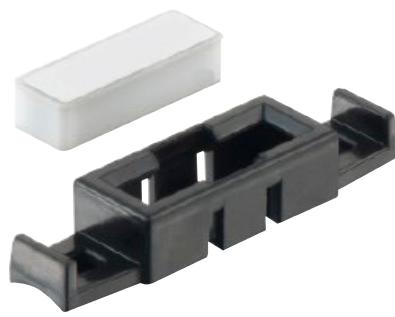

Read Range

Theoretical read range measured in free field conditions (radiated power: 2 W ERP)

Ha-VIS RFID IT 92 S (NT)

Transponder
Ha-VIS RFID IT 92 S (NT)

Features

- Optimised for the US/Asia frequency band
- Very high read ranges, in relation to the housing dimensions
- Very small size
- Flexible mounting on different surface shapes
- Supplied with 3M adhesive pad
- Holder for mounting option with cable ties included
- Protection class IP67
- Shock resistant

General description

- Very small on-metal transponder, with high read ranges
- Flexible options to integrate the Ha-VIS RFID IT 92 S (NT) on different metal surfaces
- Due to the small housing dimensions ideally suited for tool-tagging
- Optimised for function on metal
- EPC Class 1 Gen 2 compatible
- Read range on metal, 2 W ERP, 915 MHz: up to 3 m

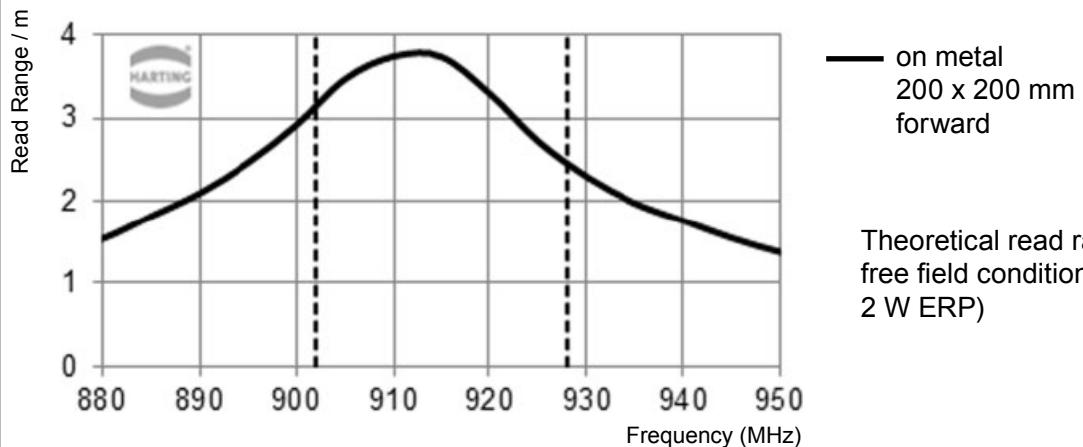

Identification	Part number	Drawing	Dimensions in mm
Ha-VIS RFID IT 92 S (NT) Packaging unit: - 10 pieces - 50 pieces	20 92 621 0901 20 92 621 0902		

Technical characteristics

Frequency range	900 ... 930 MHz, US/Asia frequency band
Protocol	EPC Class 1 Gen 2
EPC / User Memory (Chip)	128 Bit / 512 Bit (Monza 4QT)
Read range	on metal, 2 W ERP, 915 MHz: up to 3 m
Temperature range

Ha-VIS RFID Steel ID 86 S Coin - BSR

Available
May 2015

Transponder
Ha-VIS RFID Steel ID 86 S Coin - BSR

Features

- Optimised for the EU frequency band
- The steel ID coin is readable from both sides
- Extremely robust housing
- Mechanical shock resistance IK10
- Flexible mounting with screws, rivets, wire
- Protection class IP69K
- Application:
 - Maintenance of portable equipment

General description

- Particularly robust and durable transponders for repair and maintenance applications in extremely harsh environments, where a high mechanical protection is required.
- The steel ID coin is optimised to use in industry to improve the maintenance process of portable equipment with an RFID solution.
- To have a better localisation of the objects (equipped with the steel ID coins) the read range is reduced to 10 cm.
- EPC Class 1 Gen 2 compatible

Identification	Part number	Drawing	Dimensions in mm
Ha-VIS RFID Steel ID 86 S Coin - BSR Packaging unit: 10 pieces	20 92 611 1101		Dimensions in mm: Height: 23 Thickness: 1.3 Diameter: Ø30 Width: 19 Hole diameter: Ø3.4 Side thickness: 6.5

Technical characteristics

Frequency range	860 ... 870 MHz, EU frequency band
Protocol	EPC Class 1 Gen 2
EPC / User Memory (Chip)	128 Bit / 512 Bit (Monza 4QT)
Temperature range	
Operational	-45 °C ... +85 °C
Storage	-45 °C ... +105 °C
Housing	
Dimensions (W x D x H)	30 x 6.5 mm
Protection class	IP67 / IP69K
Mounting	screws, rivets, wire

Measurements

Read range with RFID UHF Handheld (0.5 W ERP)	approx. 10 cm
Possibility to read the Coin from both sides	yes
Function on metallic surfaces	yes

Ha-VIS RFID SL 89 (MT)

Passive UHF Transponder
Ha-VIS RFID SL 89 (MT)

Features

- Extremely high mechanical protection
- Degree of protection IP69K
- EPC C1 Gen2 compatible
- Extended memory

General Description

- Slot tag for integration in metallic objects like barrels, pallets or extruded profiles (slot dimensions 140 x 6 mm)
- Read range (free space, 2 W ERP): ≥ 4.0 m

Notes

Ha-VIS RFID SL 89 Set V1

Transponder

Ha-VIS RFID SL 89 Set V1

Features

- For metallic / nonmetallic surfaces
- High read ranges
- Robust
- Flexible integration in different metallic surfaces possible
- Global use possible thanks to wideband antenna design

General Description

This set consists of a metallic holder with a built-in slot, which acts as a slot antenna, and an SL 89 tag.

This is an example of how the SL can be integrated into various metallic surfaces.

- Metal container detection and management
- Flexible customizing possible
- Applications on metallic surfaces
- Read range (free space, 2 W ERP): > 10 m

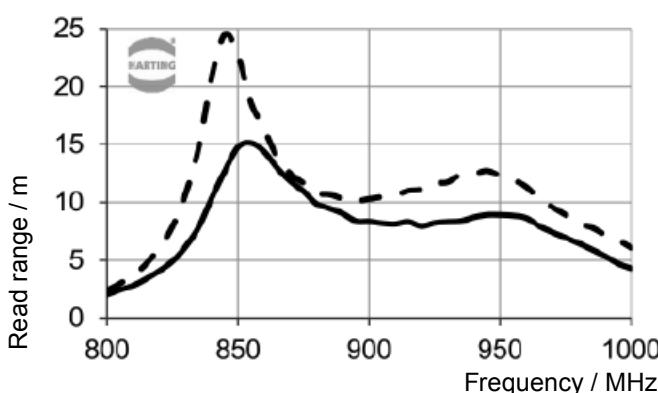

Identification	Part number	Drawing	Dimensions in mm

Notes

Ha-VIS RFID Control ETB 86v1

Available
May 2015

Transponder
Ha-VIS RFID Control ETB 86v1

Features

- Passive RFID Transponder with monitoring function
- Monitoring of 2 inputs
- Dry contact control via 8 m cable
- Optimised for the EU frequency band
- Optimised for function on metal
- Completely Class 1 Gen 2 compatible
- Read range on metal, 2 W ERP: up to 4 m
- Extremely robust and chemically resistant housings
- Easy fixing (with screws)
- High temperature resistance
- Protection class IP67

General description

- The Ha-VIS RFID Control ETB is an intelligent UHF Transponder acting as a condition monitoring system. In addition to the EPC Header and User Memory, it communicates the status of 2 digital inputs. Due to these inputs i.e. open/closed contacts are connected directly via a cable to the transponder.
- Passive mode, no power supply on transponder necessary
- Control transponder for:
 - industrial conveyor systems
 - lifts or elevator systems
 - cable cars
 - moving parts (machinery)
 - intelligent vehicles

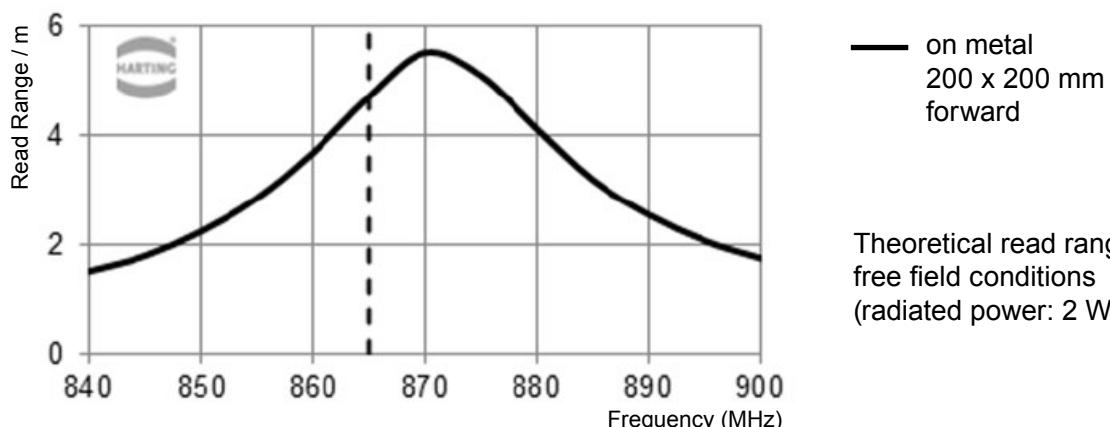

Identification	Part number	Drawing	Dimensions in mm

Connection example

RFID Reader Ha-VIS RFID RF-R500

General description

The Ha-VIS® RFID RF-R500 is a high performance UHF RFID long range reader. It supports up to 4 antennas simultaneously reducing costs and easing integration of RFID technology. Due to its robust aluminium housing and up to IP64, it is ideally suited for industrial applications.

The reader was designed for very high reading sensitivity combined with impressive reading and data processing speed. The reader brings wireless RFID communication into industrial environments.

The reader can directly control lamps, sirens or gates via the integrated GPIOs.

Features

- Up to 4 antenna
- Up to 4 W transmitting power
- Impressive bulk reading
- Power over Ethernet (PoE)
- Up to IP64 with an optional protection cap (otherwise IP53)
- 5 hardware interfaces: Ethernet, RS 232, RS 485, USB

Advantages

- High receiver sensitivity for enlarged and homogeneous tag detection range
- Metal housing
- Integrated antenna multiplexer
- Simple installation
- Versatile hardware and software configuration

Application fields

- Smart infrastructure
- Logistics
- Asset management
- Machinery

Technical characteristics

Transponder protocol	EPC Gen2 (ISO 18000-6-c)
UHF RFID antenna interface	
Antenna connection	4x SMA connector (50 Ohm); Reader internally multiplexed
Frequency area	860 MHz ... 960 MHz (depending on specific reader)
Radio license	Europe EN 302 208
Supply voltage on antenna outputs	24 V DC / 200 mA (Ha-VIS RFID RF-R500-p only)

Expansion slots	SD/MMC memory card slot 100-pin Expansion interface supports PCMCIA (Type II), GPRS/EDGE One Type II CF card slot
Power management	4400 mAh High capacity Accu (3,7 V) Advanced Smart Battery System Built-in Charger
Environmental	Withstands several drops from 1,8 m to polished concrete while powered on and configured with accessories Rain/Dust: IP65, IEC 60 629 Operating temperature: -20 °C ... +50 °C Storage temperature: -40 °C ... +60 °C Relative humidity: 5 % ... 95 % (non-condensing) ESD +/- 8 kV DC air discharge; +/- 4 kV DC contact
Dimensions (W x H x D)	223 mm x 75/100 mm x 31/42 mm
Approvals	Safety CSA/UL60950-1, IEC 60950-1, EN 60950-1 EMC FCC Part15 Class B EN 55022; EN 55024; EN 301 489 Laser IEC 60825-1, Class 2 FDA 21 CFR 1040.10, 1040.11 Class II Bluetooth 1.2 In-vehicle cradle: e Mark

Ha-VIS RFID Box

Ha-VIS RFID Box

Technical characteristics

The Ha-VIS RFID Box offers system integrators and customers a complete RFID System "out of the Box."

The box is made from steel. All components are preinstalled and tested. The box is ready for installation. You only have to connect power, Ethernet and antenna.

Properties

- 2 mm VA steel box
- Locked with key

Advantages

- Completely installed RFID system in a box
- Tested and ready to connect
- Highly modular
- Customer specific configurations
- Robust Metal housing

Standard configuration

- Ethernet Switch: Ha-VIS eCon 2050-A
- Bottom plate: Bushing; 1x M20 / 1x M25 / 4x M32

Technical characteristics

General

Housing	VA steel, powder coated
Physical dimensions (W x H x D)	430 mm x 430 mm x 220 mm
Degree of protection	IP65
Colour	light grey (RAL 7073)
Power supply	230 V or 110 V
Over voltage protection	Class II
Cable bushings	up to 10 bushings for Power, Ethernet, GPIOs, antenna cables
standard:	1 Han-Yellock® 60 bulkhead mounted housing for Power, Ethernet and GPIOs 1 Han-Yellock® 60 bulkhead mounted housing for up to 4 antenna cables
optional:	<ul style="list-style-type: none"> • Han® B <ul style="list-style-type: none"> 1 Han® 16 B bulkhead mounted housing for Power, Ethernet and GPIOs 1 Han® 24 B bulkhead mounted housing for up to 4 antenna cables • HARTING Push Pull <ul style="list-style-type: none"> 1 HARTING Push Pull for Power 1 HARTING Push Pull for Ethernet up to 4 bushings for antenna cables

Installed components

standard	<ul style="list-style-type: none"> • RFID Reader Ha-VIS RF-R500-p-EU or Ha-VIS RF-R500-c-EU • Ethernet Switch Ha-VIS eCon 2050-A • Power supply <p>All components are completely connected, tested and ready for field installation.</p>
other configuration:	on request

Further components, for example Industrial PC, heater, van on request

Ha-VIS RFID Reader

standard:	<ul style="list-style-type: none"> • for harsh industrial environments • up to 16 m read range • Degree of protection up to IP64 • excellent UHF performance in metal containing • 865 MHz ... 870 MHz • 5 / 5 GPIOs • connections for Ethernet, USB, RS 232, RS 485 • up to 4 W transmission power
other configuration:	on request

Environmental conditions

Temperature range	depending on configuration
-------------------	----------------------------

UHF Wide range antenna
Ha-VIS RF-ANT-WR30

General description

Features

- UHD RFID wide range antenna
- Reading range up to 16 m (depending upon tag properties, environment and requirements)
- Compact construction
- Optimized for portal applications
- Suitable for industrial environments
- High IP65 protection class
- Suitable for outdoor usage

Advantages

Application fields

- Smart infrastructure
- Gate applications
- Asset management
- Machinery

Technical characteristics

Technical properties

Polarization	circular
Axial ratio	typ. 1 dB
VSWR	< 1.2:1
Impedance	50 Ohm
Front-to-back ratio	> 18 dB
Far field half-power beam width	69°
Connection	TNC socket
Protection class	IP65
Weight	approx. 1.7 kg
Dimensions (WxDxH)	270 x 270 x 45 mm

Material

Antenna cover	tough, weather-resistant polymer blend colour RAL 7045
Chassis	Aluminium
Seals	thermoplastic elastomer
Installation	four M5 drill holes 100 x 100 mm
Temperature range	
storage	-40 °C ... +85 °C
ambient	-20 °C ... +55 °C

Ha-VIS RF-ANT-WR30

UHF Wide range antenna
Ha-VIS RF-ANT-WR30-EU
